This document (**Short Form PDS**) is a summary of significant information and contains a number of references to other important information contained in a separate information booklet titled *Macquarie Separately Managed Account Additional information* to the **Product Disclosure Statement (Information Booklet)**. The Short Form PDS and the Information Booklet form the product disclosure statement (**PDS**) for the SMA.

This document and the Information Booklet should be read together and considered before making a decision to invest in the SMA. You can access the PDS on the website of your Eligible Platform provider, download a copy or request a copy free of charge by calling your Eligible Platform provider or your financial adviser.

The information provided in the PDS is general information only and does not take account of your personal objectives, financial situation or needs. You should obtain financial advice tailored to your personal circumstances. This offer is only available to people receiving this PDS (electronically or otherwise) within Australia.

The information in the PDS is current as at the issue date but may change from time to time. Where information that changes is not materially adverse to investors, MISL will update this information by publishing changes at **macquarie.com.au/smatpds**. A paper copy of any updated information is available free of charge on request. MISL will update the PDS if there is a materially adverse change to information contained in the PDS.

Investments in the SMA, other than cash on deposit with Macquarie Bank Limited ABN 46 008 583 542, are not deposits with or other liabilities of Macquarie Bank Limited or of any member of the Macquarie Group and are subject to investment risk, including possible delays in repayment and loss of income and principal invested. Neither Macquarie Bank Limited, MISL nor any other member company of the Macquarie Group guarantees the performance of the SMA or the repayment of capital from the SMA or any particular rate of return.

To request a copy of this document or the Information Booklet, contact the operator of your Eligible Platform.

1. About Macquarie Investment Services Limited

MISL (**we, us, our**) is the responsible entity for the SMA as well as the implementation manager for the SMA Model Portfolios. As the implementation manager, MISL will implement all investment decisions relating to the SMA Model Portfolios and provide other administrative services for the SMA.

MISL is responsible for operating the SMA including managing and investing scheme property and ensuring scheme property is managed and dealt with in accordance with the SMA constitution (Constitution) and the Corporations Act. MISL may delegate these roles but remains responsible to investors when it does so.

MISL is a member of the Macquarie Group, a diversified financial group with institutional, corporate, government and retail clients

around the world. The Board of MISL is comprised of a majority of independent directors.

The SMA offers a selection of model investment portfolios (**SMA Model Portfolios**) provided by a range of professional investment managers (**Investment Managers**) covering a range of investment styles, allowing you to tailor your SMA investment to suit your investment needs.

You should read the important information about the Investment Managers before making a decision. Go to Section 1 of the Information Booklet, which is also available at macquarie.com.au/smatpds. The material may change between the time when you read this document and the day when you acquire the product.

2. How the Macquarie Separately Managed Account works

The SMA is a non-unitised registered managed investment scheme under the Corporations Act (ie the SMA is not a unit trust) that allows you to have an SMA account (**SMA Account**) that contains a portfolio of investments (**Portfolio**) that is beneficially owned by the investor and managed by MISL. Each Portfolio is aligned to an SMA Model Portfolio selected by the investor.

Where you invest through an Eligible Platform, you will hold an SMA Account for each SMA Model Portfolio you invest in.

Key components of the SMA

- You choose from a list of SMA Model Portfolios provided by a range of Investment Managers.
- A Portfolio is established for you for each of the SMA Model Portfolios chosen by you.
- Investments are bought and sold as required to reflect updates made to the SMA Model Portfolios by the Investment Managers.
- You may select to customise the SMA Model Portfolios you have invested in.

Many managed investment schemes issue interests to investors as units in a unit trust. The SMA is not a unit trust. Instead interests take the form of a beneficial interest in the specific investments included in the Portfolio in your SMA Account. Investments held within the SMA include listed securities and

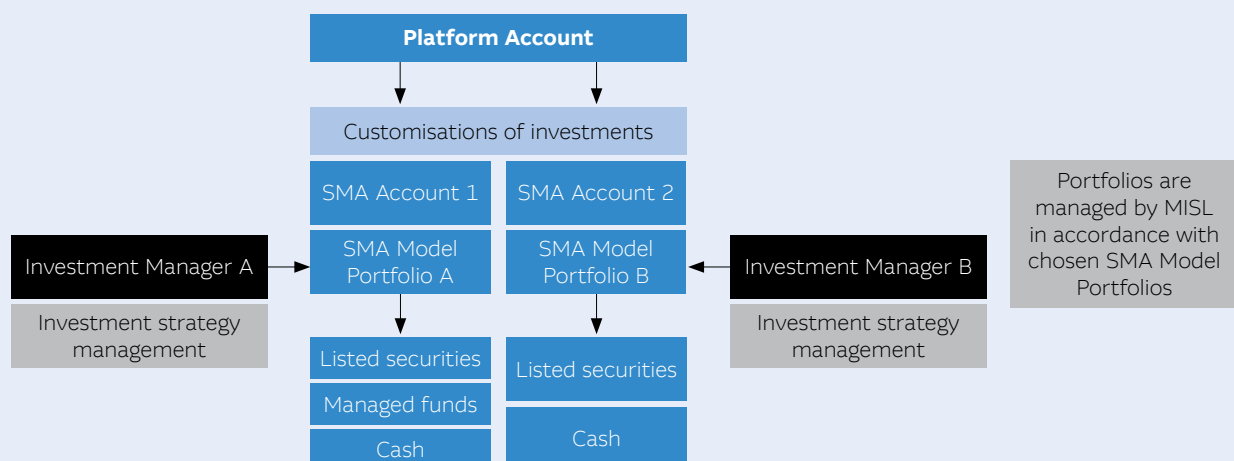

units in managed funds (including but not limited to ETFs and wholesale funds) collectively referred to as 'securities' as well as cash. The value of your SMA Account will vary as the market value of the underlying investments held in your Portfolio(s) rises or falls.

Making an investment

To invest, please follow the instructions of your Eligible Platform provider. Initial investments must be for a minimum value as specified in the SMA Model Portfolio profile included in the Information Booklet. At our discretion, we may waive the minimum investment amount and we may also establish higher minimum investment amounts or reject applications for investment in the SMA.

You can fund your SMA Account by contributing cash from your account held on the Eligible Platform (Platform Account), and by potentially transferring an existing portfolio of securities from your Platform Account to your SMA Account subject to the arrangements with your Eligible Platform provider.

Investing through an Eligible Platform

Making a contribution or withdrawal

The table below summarises the various ways that you can contribute to, or withdraw from, your SMA Account:

Type	Minimum
One off contribution – cash or security transfer	\$1,000 per contribution
Withdrawal – cash or security transfer	\$1,000 per withdrawal subject to the restrictions in Section 2.3 in the Information Booklet
Automatic cash management	Refer to your Eligible Platform provider
Income election – elect to transfer income from the SMA Account to your Platform Account	Refer to your Eligible Platform provider

Withdrawals

When an event outside MISL's control impacts on our ability to transfer assets or realise sufficient assets to satisfy withdrawal requests (for example, restricted or suspended trading in the market for an asset or a freeze on withdrawals) then this can delay transfer or payment for as long as this event continues. This means that proceeds from your withdrawal may not be available within the usual processing time.

Dividends and distributions

The frequency and calculation of income will depend on the underlying investments held in your SMA Account. As all investments in the SMA Account are beneficially owned, all income relating to these investments flow directly to the investor. Franking credits may also flow to investors if certain conditions are satisfied. We will generally elect to receive dividends and distributions in cash, which will be credited to the cash holdings within the relevant SMA Model Portfolio. You may elect for dividends, distributions, other corporate action proceeds and interest to be transferred out of the SMA Account to your Platform Account.

Indirect investors

MISL authorises the use of the PDS by Eligible Platform providers. As an investor in the SMA through an Eligible Platform you are an indirect investor. Indirect investors do not hold a direct investment in the SMA. Instead it is the Eligible Platform's custodian that directly invests in the SMA and has all the rights of a direct investor, subject to the arrangements you have in place with your Eligible Platform provider. Please contact your financial adviser or your Eligible Platform provider with any queries.

You should read the important information about contributions and withdrawals before making a decision. Go to Section 2 of the Information Booklet, also available at macquarie.com.au/smatpds. The material may change between the time when you read this document and the day when you acquire the product.

3. Benefits of investing in the Macquarie Separately Managed Account

Significant features

- Beneficial ownership of the investments within each SMA Model Portfolio.
- Choice of Investment Managers, SMA Model Portfolios and investment styles.
- An SMA Account can be funded by cash, and in some instances by transferring an existing portfolio of securities, a margin loan, or a combination of these. Please refer to your Eligible Platform provider for more information on which funding methods are available.
- The reporting you will be provided will be as per your Eligible Platform standard reporting options.
- The tax accounting method used within each Portfolio to calculate capital gains or losses will ordinarily be First in First Out (**FIFO**). This means the first parcel of an asset purchased is treated as being sold first. We may change the capital gains treatment at our discretion and without notice to you.

Significant benefits

Transparency	View all investments, transactions and fees securely online, allowing you and your adviser to see exactly what you own and track changes in your Portfolio(s).
Portability	Where permitted, transfer securities (held in the same name) into and out of your SMA Account without it resulting in a capital gains tax event.
Segregated tax position from other investors	To the extent that your Portfolio holds direct equities, your tax position is not affected by the decisions of other investors within the SMA.
Professional investment management	You are relieved of the day to day decision making responsibilities associated with managing an investment portfolio.
Diversification	The more diversified the SMA Model Portfolio, the less risk of the investor being over-exposed to the performance of any single investment holding.
Hassle free ownership	We look after all of the administration of your Portfolios, including tax record keeping, receipt of dividends, mail, corporate actions, and reporting.
Customisations	Ability to restrict certain securities or sectors from being included in your SMA Account.
SMSFs	Suitable investment solution for self managed super funds (SMSFs).
Income election	Elect to have any dividends, distributions, other corporate action proceeds and interest from the SMA transferred to your Platform Account to facilitate any regular withdrawal plans. Refer to your Eligible Platform provider for further details.
Automatic cash management	Manage the cash balance in your Platform Account through automated buying and selling of the SMA Model Portfolios. Refer to your Eligible Platform provider for further details.

Significant benefits

Disclosing entity	<p>The SMA is a disclosing entity and is subject to regular reporting and disclosure obligations under the Corporations Act. Copies of documents lodged with the Australian Securities and Investments Commission (ASIC) to meet these obligations may be obtained from, or inspected at, an ASIC office. You also have the right to request a copy of these documents from MISL when they become available, and MISL must send you a copy (free of charge) as soon as is practicable. The documents are:</p> <ul style="list-style-type: none">• the annual financial report most recently lodged with ASIC• any half yearly report for the SMA lodged with ASIC after the lodgement of the last annual report and before the date of the request, or• any continuous disclosure notices given by MISL as responsible entity for the SMA after lodgement of the last annual report and before the date of the request.
--------------------------	--

You should read the important information about other features and benefits of the SMA before making a decision. Go to Section 3 of the Information Booklet, also available at macquarie.com.au/smatpds. The material may change between the time when you read this document and the day when you acquire the product.

4. Risks of managed investment schemes

All investments carry risk. Different SMA Model Portfolios carry different levels of risk depending on the underlying mix of assets that make up each SMA Model Portfolio. Assets with the highest long term returns may also carry the highest level of short term risk.

The appropriate level of risk for you will depend on your age, investment time frame, where other parts of your wealth are invested and your individual risk tolerance.

- It is important to understand that:
- the value of your investment will go up and down
- investment returns will vary and future returns may be different from past returns
- returns are not guaranteed and there is always the chance that you may lose some or all of the money you invest in the SMA, and
- laws affecting registered managed investment schemes may change over time.

When you make an investment, you are accepting the risks of that investment. It is important to understand these risks before deciding to invest. The significant risks for the SMA are described below, but these risks are not exhaustive and there could be other risks that may adversely affect the SMA. You should seek your own professional advice on the appropriateness of this investment for your particular circumstances and financial objectives.

Market risk: Market risk refers to changes in the prices of investments in your SMA Account that may result in loss of principal or large fluctuations in the valuation of your SMA Account within short periods of time. Factors that drive changes in asset prices include:

- the changing profitability of companies and industries
- the liquidity of securities, particularly for small capitalisation equities or small companies with limited volume of security issuances
- the changes in economic cycles and business confidence
- the country in which the market resides and its government and central bank policies, its economic or social developments, and instances of instability such as recession or armed conflict, and
- where there is an emerging market exposure, which is generally riskier than developed markets due to factors such as lower liquidity, the potential for political unrest, the increased likelihood of sovereign intervention (including default and currency intervention), currency volatility, and legal system instability.

Volatility risk: Volatility risk refers to the potential for the price of investments in your SMA Account to vary, sometimes markedly and over a short period of time. Generally the higher the potential return, the higher the risk and the greater the chance of substantial fluctuations in returns over a short period of time. In particular, investments in listed securities are traditionally towards the higher end of the risk-return spectrum. This may lead to fluctuations in the value of your SMA Account, including fluctuation over the period between a withdrawal request being made and the time of payment. Markets are volatile and indeed volatility in some markets can often be very high.

Security specific and concentration risk: Each investment in a company's securities is subject to the risk of that particular company's performance due to factors that are pertinent to that company, the sector of the market to which the company belongs, or the equity market generally. This risk also includes changes in credit ratings from rating agencies.

The fewer the number of securities in your SMA Account, the higher the concentration risk. The more concentrated your SMA Account is, the greater the risk that poor performance in a group of investments may significantly affect the performance of your SMA Account.

Currency risk: Currency risk is the risk that fluctuations in exchange rates between the Australian dollar and foreign currencies may cause the value of international investments to decline significantly. If your SMA Account includes exposure to international investments or companies with foreign investments or exposure, they may not be hedged back to Australian dollars and therefore your SMA Account may be exposed to currency risk.

Investment manager risk: Investment manager risk refers to the risk that an investment manager will not achieve the performance objectives or not produce returns that compare favourably against its peers. Additionally, there is the risk that a manager's investment strategy may not prove to be effective. Many factors can negatively impact the manager's ability to generate acceptable returns from their investment management process, including loss of key staff.

Responsible entity and managed investment scheme risk:

There are risks associated with the operational and financial performance of MISL as responsible entity. The custodian holds your Portfolio and MISL manages your Portfolio and is responsible for making Portfolio investment decisions based on the SMA Model Portfolios. In addition, MISL's key professionals could change or MISL could be replaced and this might affect how the Portfolio is managed.

There are also risks associated with the structure of the SMA, including that it could terminate or the fees and expenses could change.

Implementation risk: There is a risk that the performance of your Portfolio(s) will differ from that of the corresponding SMA Model Portfolio(s). This occurs due to factors such as differences in the buy and sell prices of investments compared to the SMA Model Portfolio(s), fees, movements of cash and securities into and out of Portfolio(s), including from any automatic cash management or income elections or any differences in weights of holdings due to our requirement for a minimum cash holding of 1 per cent, ASX rules around non-marketable trade parcel size (as explained below), Macquarie Group imposed trading restrictions, any trading restrictions imposed by the Eligible Platform, changes to the Minimum Portfolio Size and external factors, for example if trading in a particular security is subject to liquidity constraints or has been restricted or suspended in the market and where we determine that a security is unable to be held in an SMA Model Portfolio because it is inconsistent with how the SMA Model Portfolio has been described (please refer to Section 5.12 of the Information Booklet).

The ASX rules governing non-marketable trade parcel size (currently \$500) may prevent us from implementing transactions with a value of less than the minimum parcel size from time to time. As a result we might not be able to fully implement the SMA Model Portfolio as advised by the investment manager.

Counterparty and credit risk: Counterparty risk is the risk of loss due to a counterparty not honouring a commitment, which may cause the value of your SMA Account to fall. Counterparties include custodians, brokers and settlement houses. Credit risk is the risk that for cash and interest rate investments, income and/or your capital investment will not be repaid due to the financial position of the financial institution or issuer of that investment.

Liquidity risk: Particular securities or investments may be difficult to purchase or sell, preventing the SMA from closing out a position or rebalancing within a timely period and at a fair price. As a result withdrawal requests may not be able to be fully met when they are received. Liquidity risk may potentially be amplified where a Portfolio invests in listed interest rate securities and unlisted managed funds due to the illiquid nature of these assets. Interest rate risk: Movements in domestic and international interest rates may cause the value of your investments to decline.

Leverage risk: If you have borrowed to fund your SMA Account, you will be subject to a number of additional risks including, but not limited to, margin calls as a result of market volatility, increased losses as a result of increased exposure, and interest rate risk. If you are utilising a margin loan and your SMA Account goes into margin call, it may be necessary to sell investments in your SMA Account and use the proceeds to reduce your loan balance. You should refer to your lender's offer document for full details of the risks involved.

Derivative risk: Derivatives are financial instruments that are used to obtain or reduce market exposures. They can potentially create leveraged positions, where exposures are obtained that are greater than the value of assets required to support them. As the market value of derivatives positions are variable, gains or losses can be incurred, and can be greater than unleveraged positions. The use of derivatives may also expose the SMA Model Portfolios that use them to risks including counterparty default, legal and documentation risk.

Change of law and other statutory and trading restrictions: Changes in laws or their interpretations including, but not limited to, taxation and corporate regulatory laws, practice and policy, could have a negative impact on the returns of investors. In certain circumstances, statutory or internal Macquarie Group imposed restrictions may preclude the acquisition or disposal of securities in your SMA Account. Without limitation, this includes where the acquisition would cause the Macquarie Group's aggregated holdings in a company (including holdings that the Macquarie Group is required to aggregate) to exceed applicable takeover thresholds. In addition, where, due to such restrictions, there is limited capacity to acquire particular securities, your SMA Account will not have priority over any member of, or any other fund associated with, the Macquarie Group to acquire those securities. Such restrictions may result in an adverse effect on the value of the investments in your SMA Account due to your SMA Account being unable to enter into positions or exit positions as and when desired.

Customisation risk: There is a risk that portfolio customisation may trigger additional trading (including associated costs), impact the performance of your investments and may result in negative returns and/or underperformance of the Portfolio(s) relative to your selected SMA Model Portfolio(s).

5. How we invest your money

Warning: You should consider the likely investment return, risk and your investment time frame when choosing one or more SMA Model Portfolios in the SMA.

The SMA may offer you a variety of SMA Model Portfolios from a range of Investment Managers across asset classes such as Australian equities, international equities, property, fixed interest, alternative investments and cash. You may select one SMA Model Portfolio or a combination of SMA Model Portfolios in order to meet your investment needs but you do not select the securities (including but not limited to ETFs, managed funds,

wholesale funds and listed securities) that make up those SMA Model Portfolios.

The SMA may provide multi-asset class SMA Model Portfolios across different risk levels, providing diversification in style, investment manager and asset class. As an example, please refer to the below table for information on the Vanguard Diversified Growth Model Portfolio. Information about all other SMA Model Portfolios is contained in Section 5 of the *Information Booklet*.

Name	Vanguard Diversified Growth
Investment manager	Vanguard Investments Australia Limited
Investment return objective	To track the weighted average return of the various indices of the underlying funds in which it invests, in proportion to the Strategic Asset Allocation, before taking into account fees, expenses and tax.
Who should invest	The Vanguard Diversified Growth Model Portfolio is biased towards growth assets, and is designed for investors seeking long-term capital growth. The portfolio targets a 30% allocation to income asset classes and a 70% allocation to growth asset classes.
Suggested minimum investment timeframe	7+ years

Description	The Vanguard Diversified Growth Model Portfolio provides low-cost access to a range of ETFs, offering broad diversification across multiple asset classes. Each of the Vanguard Diversified Model Portfolios seeks to achieve its objective by employing a passive investment strategy that tracks the weighted average return of the various indices of the underlying ETFs, in proportion to their applicable Strategic Asset Allocation (SAA), before taking into account fees, expenses and tax. The strategic asset allocation has been established to achieve investment risk and return outcomes commensurate with the respective risk profile. The portfolios each gain their investment exposure to the applicable asset class by investing into the underlying ETFs. Each underlying ETF utilises a passive investment management approach to achieve its investment objective and generally seek to closely track the performance of well-regarded third party indices.			
Indicative asset allocation	Australian shares:	26% to 30%	International fixed interest:	19% to 23%
	Australian fixed interest:	7% to 11%	Cash:	1.5% to 59%
	International shares:	32% to 44%		
Risk level	High			
Standard Risk Measure	6			
Minimum Portfolio Size	\$50,000. Refer to Section 5 of the Information Booklet for more information on Minimum Portfolio Size.			

You should read the important information about the SMA Model Portfolios, changes to SMA Model Portfolios, how you can switch your investments and the extent to which labour standards or environmental, social or ethical considerations are taken into account in the selection, retention or realisations of investments before making a decision. Go to Section 5 of the Information Booklet, also available at macquarie.com.au/smatpds. The material may change between the time when you read this document and the day when you acquire the product.

6. Fees and costs

Did you know?

Small differences in both investment performance and fees and costs can have a substantial impact on your long term returns. For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example, reduce it from \$100,000 to \$80,000). You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs. You may be able to negotiate to pay lower fees¹. Ask the fund or your financial adviser.

To find out more

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** Moneysmart website (www.moneysmart.gov.au) has a managed funds fee calculator to help you check out different fee options.

Fees and other costs for the Vanguard Diversified Growth Model Portfolio

The fees and costs summary below is based on the fees and costs of investing in the Vanguard Diversified Growth Model Portfolio. Please note the fees and costs that apply will depend on the SMA Model Portfolio(s) you select. You can find the fees and costs for each of the SMA Model Portfolios in Section 6 of the Information Booklet. These fees and costs may be deducted from the cash balance of your SMA Account or indirectly reduce the

value of, or returns from, your investments. You should read all the information about fees and costs because it is important to understand their impact on your investment.

The information in the Fees and Costs Summary can be used to compare costs between different simple managed investment schemes.

Fees and cost summary²

Macquarie Separately Managed Account – Vanguard Diversified Growth Model Portfolio

Type of fee or cost	Amount	How and when paid
Ongoing annual fees and costs		
Management fees and costs³: The fees and costs for managing your investment.	0.299% pa	This comprises: a. a management fee of 0.123% pa deducted monthly in arrears from the cash balance of your SMA account; and b. fees and costs of 0.176% pa that indirectly reduce the value of investments in the SMA Model Portfolio. These costs are reflected in the value of your investment when incurred.
Performance fees³: Amounts deducted from your investment in relation to the performance of the product.	0.000% pa	These amounts are deducted by the issuers of managed funds held in the SMA Model Portfolio and are reflected in the value of your investments when incurred.

¹ The fees and costs in the SMA product are not negotiable for retail clients.

² See Section 6.1 of the Information Booklet for detailed fees and costs of all SMA Model Portfolios.

³ These figures are estimates.

Type of fee or cost	Amount	How and when paid
Transaction costs³: The costs incurred by the scheme when buying or selling assets.	Indirect Transaction Cost: 0.003% pa	An estimate of the amount by which the return on the managed investments in the SMA Model Portfolio has reduced over a year, for transaction costs deducted by the issuers of the managed investments in the SMA Model Portfolio. These costs are reflected in the value of your investments when incurred; and
	PLUS Listed Transaction Fee: \$5.50 pa	An estimate of annual Listed transaction fees for trades of listed securities in the SMA Model Portfolio (at a rate of \$5.50 per listed security trade). Listed transaction fees will be either deducted from the sale proceeds or added to the purchase costs of a transaction, processed on the cash balance of your SMA Account at the time the trade settles.
Member activity related fees and costs (fees for services or when your money moves in or out of the scheme)⁴		
Establishment fee: The fee to open your investment.	Nil	Not applicable
Contribution fee: The fee on each amount contributed to your investment.	Nil	Not applicable
Buy-sell spread: An amount deducted from your investment representing costs incurred in transactions by the scheme.	Nil	Not applicable
Withdrawal fee: The fee on each amount you take out of your investment.	Nil	Not applicable
Exit fee: The fee to close your investment.	Nil	Not applicable
Switching fee: The fee for changing investment options.	Nil	Not applicable (but a Listed transaction fee will apply to each transaction involved in switching SMA Model Portfolios) ⁵ .

Example of annual fees and costs – Vanguard Diversified Growth Model Portfolio

This table gives an example of how the ongoing annual fees and costs in the Vanguard Diversified Growth Model Portfolio can affect your investment over a 1-year period. You should use this table to compare with other products offered by managed investment schemes.

EXAMPLE - Vanguard Diversified Growth Model Portfolio		Balance of \$50,000 with a contribution of \$5,000 during the year
Contribution fees	Nil	For every additional \$5,000 you put in, you will be charged \$0.00 .
PLUS Management fees and costs	0.123% pa deducted directly PLUS 0.176% pa deducted indirectly	And , for every \$50,000 you have in the Vanguard Diversified Growth Model Portfolio you will be charged or have deducted from your investment \$149.50 each year.
PLUS Performance fees	0.000% pa	And , you will be charged or have deducted from your investment \$0.00 in performance fees each year
PLUS Transaction costs	0.003% pa PLUS \$5.50 pa	And , you will be charged or have deducted from your investment \$7.00 in transaction costs each year.
EQUALS cost of Vanguard Diversified Growth Model Portfolio		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees and costs of \$156.50 . What it costs will depend on the investment option you choose and the fees you negotiate.

*Additional fees may apply. Some amounts include estimates: See the Additional explanation of fees and costs of the Information Booklet for further information.

Changes to fees

The fees are current as at the date of this document although cost estimates are generally based on prior financial year(s). MISL reserves the right to vary fees, and to introduce additional fees without your consent. Factors which may lead fees to vary include legal, economic, policy and procedural changes. The right to vary fees is at our discretion, subject to any restrictions under the Constitution and the law and this is not an exhaustive list of circumstances that would lead us to vary fees of the SMA. We will give you notice as required by law, if any fees or charges increase.

⁴ See Section 6.2 of the Information Booklet for details on other fees and costs.

⁵ See the Listed transaction fee section in Section 6.2 of the Information Booklet for further details on the application of the Listed transaction fee.

Fees include the net effect of GST (unless otherwise indicated). This means that fees stated in this document represent the fee charged plus applicable GST, less any reduced input tax credits (RITCs) that have been claimed by the SMA.

Fees to financial advisers

Warning: Additional fees may be payable by you to your financial adviser. The Statement of Advice issued by your financial adviser will set out details of those additional fees. The SMA does not pay any commissions to your financial adviser.

The Calculator provided by the Australian Securities & Investments Commission (**ASIC**) at (www.moneysmart.gov.au) can be used to calculate the effect of fees and costs on account balances.

You should read the important information about fees and costs in relation to other SMA Model Portfolios and the SMA generally before making a decision. Go to Section 6 of the Information Booklet, also available at macquarie.com.au/smatpds. The material may change between the time when you read this document and the day when you acquire the product.

7. How managed investment schemes are taxed

Warning: Investing in a registered managed investment scheme is likely to have tax consequences. You are strongly advised to seek your own professional tax advice before making an investment decision. Registered managed investment schemes do not pay tax on behalf of investors. Investors are assessed for tax on any income and capital gains generated by the investments in their SMA Account.

The SMA may claim RITCs to which it is entitled to under GST law in relation to eligible expenses of the SMA. Where we have claimed a RITC, we will pass the benefit of this on to you. However, from time to time, changes to the nature of those fees may mean that we are no longer able to claim RITCs in respect of certain costs. If that happens, the full GST amount will be passed to you.

You should read the important information about taxation matters before making a decision. Go to Section 7 of the Information Booklet, also available at macquarie.com.au/smatpds. The material may change between the time when you read this document and the day when you acquire the product.

8. How to apply

Read this document together with the *Information Booklet*, available at macquarie.com.au/smatpds, before making a decision whether to invest.

As an indirect investor you may use the information in the PDS to direct your financial adviser to invest in the SMA on your behalf. To invest in the SMA, you will need to first set up an account with an Eligible Platform.

Cooling-off

Because you are an indirect investor and the custodian for your Eligible Platform is a wholesale client under the Corporations Act, cooling-off rights are not available to you. Please refer to the offer document for your Eligible Platform for further information about cooling off rights.

Complaints

Indirect investors should consult the offer document provided by the relevant Eligible Platform provider for details of available complaints procedures. We have provided consent to the Eligible Platform provider to the effect that we will receive complaints directly from indirect investors. We will assess your complaint and advise you of the outcome, either by telephone or in writing.

If you would like to make a complaint, please refer to macquarie.com.au/feedback-and-complaints, or contact:

The Complaints Manager

Macquarie Investment Services Limited
GPO Box 2520, Sydney NSW 2001

If you are not satisfied with our handling of a matter, you can contact the Australian Financial Complaints Authority (**AFCA**), an external dispute resolution scheme, of which Macquarie is a member.

If you are not satisfied with our response after 30 days, you can lodge a complaint with AFCA. AFCA provides independent financial services complaint resolution free of charge.

You can contact AFCA as follows, quoting membership number 10636:

Australian Financial Complaints Authority

GPO Box 3
Melbourne VIC 3001
Email: info@afca.org.au
Tel: 1800 931 678 (free call)
Website: www.afca.org.au

Macquarie Customer Advocate

The Macquarie Customer Advocate's role is to:

- listen to our customers and provide a customer-centric voice when making recommendations to improve customer experience
- minimise the risk of future problems by reviewing key customer themes
- work with Macquarie complaint teams to promote fair and reasonable customer outcomes.

The Macquarie Customer Advocate is separate to Macquarie's operating, risk and support groups including its internal dispute resolution teams.

1. About the Investment Managers

Their investment philosophy aims to deliver positive, attractive, long-term inflation adjusted returns for their clients

Watershed Funds Management Pty Ltd

Watershed Funds Management Pty Ltd ABN 11 166 324 858, a corporate authorised representative of Watershed Dealer Services Pty Ltd ABN 29 162 693 272, AFSL 436357 (**Watershed**), is a boutique Australian investment manager that delivers client focused investment solutions to institutions, intermediaries, financial planners and high net worth investors.

Watershed's fundamental goal is to protect and create capital for their clients by delivering on their investment philosophy of taking strategic positions in and out of all asset classes throughout the investment cycle, whilst

identifying and holding high quality companies for the medium to long term within each asset class.

Wealthtrac Pty Ltd

Wealthtrac Pty Ltd ABN 29 098 058 523, AFSL 404335 (**Wealthtrac**) was established in 2001 to develop and distribute superannuation and investment products through self-licenced financial planners.

In 2018, Wealthtrac expanded its range of products to include SMAs with the formation of an investment team and input from specialist industry consultants to assist with investment strategy and fund managers selection.

Zenith Investment Partners Pty Ltd

Zenith Investment Partners Pty Ltd ABN 27 103 132 672, AFSL 226872 (**Zenith**) is an investment consulting and research provider dedicated to the delivery of investment solutions to customers.

Founded in 2002, Zenith has been a long standing provider of these services to the Australian finance services industry employing dedicated investment professionals primarily involved in research and consulting.

Important information about Investment Managers

Investment Managers may include in an SMA Managed Portfolio a managed fund that is managed by them or for which they are appointed in an advisory role. They may receive a fee separate and additional to the investment management fee paid by MISL from the management fee it receives as responsible entity of the SMA. Any such additional fee does not represent an additional fee or cost to you.

Consents

Each of the above Investment Managers has given its written consent to the issue of this PDS with the statements about the particular Investment Manager and that Investment Manager's strategy appearing in the form and context in which they appear, and none of them have withdrawn that consent before the date of this Information Booklet. MISL is not responsible for any statements made about the Investment Manager or the Investment Manager's strategy. Each of the Investment Managers takes no responsibility for the issue of the PDS or for any statements contained in the PDS other than those about the particular Investment Manager and that Investment Manager's strategy.

2. How the Macquarie Separately Managed Account works

You are known as an indirect investor if you access the SMA through an Eligible Platform. Indirect investors do not hold a direct investment in the SMA. Instead it is the Eligible Platform's custodian that directly invests in the SMA and has all the rights of a direct investor, subject to the arrangements you have in place with your Eligible Platform provider. Please contact your financial adviser or your Eligible Platform provider with any queries.

To invest in the SMA, you will need to first set up a Platform Account by completing the Eligible Platform application form. You should also refer to your Eligible Platform's offer document for your rights and entitlements, including any relevant 'cooling off' provisions.

2.1 Establishing an SMA Account

Funding your SMA Account

You can fund your SMA Account with cash from your Platform Account or in some instances, by transferring an existing portfolio of securities from your Platform Account, a margin loan, or a combination of these. Contact your Eligible Platform provider for more information.

If the securities you contribute are not in the SMA Model Portfolio(s) selected by you (or are in excess of the model's weighting), those securities will generally be sold on the next trading day, and the proceeds used to purchase securities in the selected SMA Model Portfolio(s) at the correct weightings.

Please note that security sales generally give rise to tax consequences, therefore you should consider whether to contribute securities that are unlikely to be included in your chosen SMA Model Portfolio. Please refer to Section 7 for more information on how managed investment schemes are taxed.

The cost base information provided by your Eligible Platform provider will be accepted as being correct. Please be careful to ensure this data is recorded accurately, as a fee may be incurred to correct it later if it is wrong.

In the event that the law or events outside of MISL's control (for example, restricted or suspended trading in the market for an asset or a freeze on investment withdrawals), prevents us from receiving transfers of a particular security, the transfer of that particular security will not be processed and your financial adviser will be informed of the situation. MISL has an absolute discretion to refuse transfers of securities.

Margin lending

You can establish a margin loan with an approved lender. Please refer to your Eligible Platform provider for more information on which lenders are approved. Your lender is likely to have certain rights as a mortgagee over some or all of the securities in your SMA Account that are held

by the appointed custodian. It is important to note that where you have a margin loan and have granted security for that loan to your lender over securities in your SMA Account, your Eligible Platform is not obliged to act on your instructions in respect of these securities in your SMA Account without the lender's permission. In respect of a margin call your Eligible Platform provider may act on instructions from your lender without reference to you.

2.2 Additional investment contributions

You can make additional investment contributions using cash or securities from your Platform Account to your SMA Account at any time, subject to a minimum of \$1,000 per contribution.

You may elect to participate in the automatic cash management process on the Eligible Platform, which may contribute cash to your specified SMA Model Portfolios.

When you make an additional investment contribution of cash or securities, that is not part of the automatic cash management process, you must elect which existing Portfolio(s) the contribution is to be applied to, or if it is to be applied to a new SMA Model Portfolio, in which case the Minimum Portfolio Size requirements apply.

In the event that the law or events outside of MISL's control (for example, restricted or suspended trading in the market for an asset or a freeze on investment withdrawals), prevents us from receiving transfers of a particular security, the transfer of that particular security will not be processed and your financial adviser will be informed of the situation. MISL has an absolute discretion to refuse transfers of securities.

2.3 Investment withdrawals

You may request an investment withdrawal from the SMA at any time, subject to a minimum investment withdrawal amount of \$1,000 and maintaining the required minimum portfolio size specified in Section 5.17 of this Information Booklet as amended from time to time (**Minimum Portfolio Size**). If you request an investment withdrawal that brings the value of your Portfolio below the Minimum Portfolio Size, this will be deemed to be an instruction for

2. How the Macquarie Separately Managed Account works

a complete investment withdrawal and all assets in your Portfolio will be sold and the funds paid to your Platform Account. You may at times be contacted regarding your investment withdrawal request.

You may elect to participate in the automatic cash management process offered by the Eligible Platform which may withdraw funds from your selected SMA Model Portfolios.

You may elect on the Eligible Platform to withdraw any dividends, distributions, other corporate action proceeds and interest received in your SMA Model Portfolios.

Funds will be paid to your Platform Account. To make an investment withdrawal please follow the instructions from your Eligible Platform provider.

If sufficient cash is available in your relevant Portfolio(s) (bearing in mind the requirement to hold a minimum 1 per cent of cash) your investment withdrawal request will generally be processed within two Business Days.

Where sufficient cash is not available in your relevant Portfolio(s) to process your investment withdrawal request, some investments will need to be sold in order to generate sufficient cash. In this event, time is needed for the sell transactions to be executed and settled. Proceeds from investment withdrawals will usually be available within five to ten Business Days of the investment withdrawal request date, but this period may be longer. Please note that security sales generally give rise to tax consequences. Please refer to Section 7 for further details.

When an event outside MISL's control impacts its ability to transfer assets or realise sufficient assets to satisfy investment withdrawal requests (for example, restricted or suspended trading in the market for an asset, freeze on investment withdrawals, as allowable under law, the terms of an investment itself or the terms of the Eligible Platform) then this event can delay transfer or payment for as long as this event goes on.

When you make an investment withdrawal, your relevant Portfolio(s) will be re-weighted on the next trading day to bring it or them back into line with the corresponding SMA Model Portfolio(s) weightings.

2.4 Closing your SMA Account

When closing your SMA Account, you can elect to have:

- assets sold and the proceeds paid by electronic transfer to your Platform Account
- assets transferred to your Platform Account (as allowable under law, the terms of an investment itself or the terms of the Eligible Platform), or
- a combination of the above.

To close your SMA Account, please follow the instructions from your Eligible Platform provider.

Following receipt of the request to close your SMA Account, we will cease to implement all portfolio management decisions received from the investment manager or the investment adviser for your SMA Model Portfolio.

Prior to closing your SMA Account, the balance will be applied to pay all outstanding margin loan obligations, fees

and charges prior to sending the final proceeds to your Platform Account.

If you choose a cash payment, the payment will be processed as an investment withdrawal (refer to Section 2.3 for further details).

If you choose a securities transfer, those securities will be transferred to your Platform Account where such a securities transfer is permitted under the terms of that Eligible Platform. You should confirm if a securities transfer is permitted under the terms of that Eligible Platform before requesting a transfer. Please note that a Security Transfer Fee may apply. Please note that where a securities transfer is not permitted, the only way you can close your SMA Account is by way of a cash payment.

Typically managed fund redemptions are processed within five Business Days, but this period may be longer. You may elect to have managed fund holdings transferred to your Platform Account, but this will only be actioned if a securities transfer of managed funds is permitted under the terms of that Eligible Platform, if the holding size meets the fund manager's minimum requirement and, if applicable, you are a wholesale client (within the meaning of the Corporations Act). Transfers of managed funds can take a minimum of four weeks to complete.

Prior to closing your SMA Account, the balance will be applied to pay all outstanding fees and charges prior to sending the final proceeds to your Platform Account.

It may be necessary to keep your SMA Account open for a period of time pending receipt of any outstanding dividends, distributions and corporate actions. During this time, either the full SMA Account balance or a notional amount will be retained within your SMA Account on which you may earn interest based on the applicable variable interest rate. Contact your Eligible Platform provider for more information. Upon closure of your SMA Account any accrued interest will be paid by the end of the month. This payment will be made to your Platform Account.

Your Eligible Platform provider will provide you with a final annual tax report after the end of the Australian financial year in which your SMA Account is closed. The annual tax report will be issued in accordance with the assumptions set out in Section 7 of this Information Booklet.

2.5 Privacy statement

Your privacy is important to MISL. This statement explains how your personal information will be used and disclosed and provides information about your privacy rights.

We may collect, hold, use and disclose personal information about you to process your application, administer and manage the products and services sought by and provided to you, monitor, audit and evaluate those products and services, model and test data, communicate with you and deal with any complaints or enquiries. We collect and record personal information through our interactions with you and your nominated adviser(s), including by telephone, email or online. We may also collect personal information from public sources and third parties including information brokers and our service providers. Without this information, we may not

2. How the Macquarie Separately Managed Account works

be able to process your application or provide you with an appropriate level of service.

We are required or authorised to collect your personal information under various laws including Anti-Money Laundering and Counter-Terrorism Financing Act, Superannuation Industry (Supervision) Act, Taxation Administration Act, Income Tax Assessment Act, Corporations Act, Life Insurance Act, Insurance Contracts Act and the Foreign Account Tax Compliance Act (US), and any similar law of any country, and any related laws designed to implement those laws in Australia.

Where you provide us with personal information about someone else you must first ensure that you have obtained their consent to provide their personal information to us based on this privacy statement. We may exchange your personal information with other companies in the Macquarie Group as well as our service providers which are described further in our privacy policy. We will supply the adviser(s) nominated on your application form or in a subsequent written communication to us, and their Australian financial services licensee if applicable, with information about your account.

We may also disclose personal information to regulatory authorities (eg tax authorities in Australia and overseas) in connection with their lawful information requests or to meet our legal obligations in any relevant jurisdiction. The third parties with whom we exchange personal information may operate outside of Australia (this includes locations in India and the Philippines and the countries specified in our privacy policy). Where this occurs, we take steps to protect your information against misuse or loss. We and other companies in the Macquarie Group may use your personal information to contact you on an ongoing basis by telephone, electronic messages (like email), online and other means to offer you products or services that may be of interest to you, including offers of banking, financial, advisory, investment, insurance and funds management services, unless you change your marketing preferences by contacting us as set out below or visiting **macquarie.com.au/optout-bfs**. Under the Privacy Act, you may request access to your personal information that we hold. You can contact us to make such a request or for any other reason relating to the privacy of your personal information by emailing **privacy@macquarie.com**.

Please mark any written communications to the attention of our Privacy Officer.

The Privacy Officer

Macquarie Investment Services Limited
1 Shelley Street, Sydney NSW 2000

You may also request a copy of our privacy policy which contains further details about our handling of personal information, including how you may access or update your personal information and how we deal with your concerns. The Privacy Policy can also be found via **macquarie.com.au**.

3. Benefits of investing in the Macquarie Separately Managed Account

This section provides further information on the features and benefits of the SMA.

3.1 Features

Beneficial ownership

The most significant feature of the SMA is the beneficial ownership of the investments held in your SMA Account. This feature facilitates the transfer in and out of securities, and where applicable the tax transparency of all the securities held in each SMA Model Portfolio, your own tax cost position and direct flow through of all income. As an indirect investor, you should consult the offer documents provided by your Eligible Platform provider to determine whether beneficial ownership of SMA Account investments is affected by investing in the SMA through the Eligible Platform.

It is important to recognise that beneficial ownership is not identical to holding these investments in your own right. Please note the following differences:

- the custodian will be the legal owner of the investments rather than you. MISL maintains a register of holdings for each investor
- for managed investments, you do not become the direct unit holder. The registered unit holder will be the custodian of the Eligible Platform
- for listed securities:
 - you do not receive communications directly from companies or share registries including such things as corporate action notifications, dividend payments, and notices of meetings. These are processed on your behalf. By doing so, the administrative burden of direct ownership is removed, providing you with consolidated reports detailing activity on your SMA Account
 - you are not entitled to shareholder benefits such as discount cards, nor will you be able to vote at shareholder meetings.

Within each SMA Model Portfolio that you hold, there is a separate cash holding. These cash holdings are held by an appointed custodian and deposited with Macquarie Bank Limited ABN 46 008 583 542. These deposits will be pooled with other investors' cash holdings for the purpose of calculating Financial Claims Scheme entitlements. The Financial Claims Scheme (FCS) (commonly referred to as the Australian Government deposit guarantee)

guarantees the deposits of account holders up to a limit of \$250,000 per account-holder per authorised deposit taking institution (**ADI**) (such as Macquarie Bank). Your SMA Account's cash holding will not be directly protected by the FCS. You may have a pro-rata interest in the appointed custodian's aggregate cap amount of \$250,000 per account holder per ADI, however, this ranks in proportion with all other investor holdings which means that your pro-rata interest is likely to be negligible. Please contact your Eligible Platform provider if you would like further information about the FCS.

Custody

MISL has appointed Bond Street Custodians Limited ABN 57 008 607 065 AFSL 237489 (**BSCL**) as custodian to hold in custody all the assets within the SMA. MISL may change SMA custodians from time to time.

The cash holdings within your SMA Account are paid into accounts held in the name of the custodian. The accounts opened by Australian custodians are trust accounts operated in accordance with the Client Money Rules as set out in the Corporations Act (**Trust Accounts**). Your cash holdings may be pooled in the Trust Accounts with the cash holdings of other investors.

The Trust Accounts operate in the following way:

- each Trust Account is a bank account held by the custodian with an Australian deposit taking institution or an approved foreign bank. Currently the Trust Accounts are held with Macquarie Bank Limited ABN 46 008 583 542
- payments out of a Trust Account will only be made in the following circumstances:
 - making payments to you or in accordance with your directions
 - making payments to another Trust Account
 - making investments instructed by MISL or an Investment Manager in accordance with your selected SMA Model Portfolio
 - paying MISL or the custodian of any monies that you owe them
 - defraying brokerage and other proper charges, and
 - making a payment that is otherwise authorised by law

3. Benefits of investing in the Macquarie Separately Managed Account

- where payments in respect of your SMA Account are required to be made or received by the custodian through a settlement and clearing Trust Account (eg to settle on-market transactions) any interest earned on such a settlement and clearing Trust Account shall be retained by the custodian and shall not be returned to you
- you will be entitled to the interest earned on your cash holdings in all Trust Accounts that are not settlement and clearing accounts. The bank with which the Trust Accounts are held sets the interest rates on the Trust Account having regard to competing rates of return in the market, and changes in interest rates, which respond to factors such as inflation, economic conditions and actions by the Reserve Bank of Australia. Current rates applicable to your cash holdings are available online at [macquarie.com.au/wrap-cash-interest-rates](https://www.macquarie.com.au/wrap-cash-interest-rates).

BSCL is a related body corporate of MISL. All related party transactions are conducted on arm's length terms. Any conflict of interest or potential conflict of interest is managed in accordance with Macquarie Group's Conflict of Interest Policy.

Choice of SMA Model Portfolio

You can choose one SMA Model Portfolio or a combination of SMA Model Portfolios. The SMA offers a selection of investment styles provided by a range of Investment Managers, allowing you to tailor your choice of SMA Model Portfolios to suit your investment needs.

Reporting

Online reporting will be available through your Eligible Platform provider, who will also provide you with quarterly reports.

Tax reports

After the end of a tax year you will be provided details of any assessable income, capital gains, tax credits and any other relevant items to include in your tax return, in accordance with the assumptions set out in Section 7 of this Information Booklet. This will be provided to you by your Eligible Platform provider.

If you close your SMA Account, you will be provided your annual tax report after the end of the tax year in which your SMA Account is closed.

Tax accounting method

The tax accounting method used within each Portfolio to calculate capital gains or losses will ordinarily be First in First Out (**FIFO**). This means the first parcel of an asset purchased is treated as being sold first. We may change the capital gains treatment at our discretion and without notice to you.

Constitution

The relationship between MISL and direct investors is governed by the PDS, the SMA constitution (**Constitution**), the Corporations Act and other laws.

The Constitution details direct investors' rights in relation to investments in the SMA. As you are an indirect investor, only your Eligible Platform provider may exercise the rights set out in the Constitution.

Generally the Constitution:

- sets out rights to absolute and beneficial entitlement to the assets (including income) in an SMA Account
- defines rights to withdraw from the SMA, and what a direct investor is entitled to receive when withdrawing from the SMA
- defines when the SMA may be wound up and what direct investors are entitled to receive on winding up
- states that the direct investor's liability is generally limited to the relevant SMA Account
- states the quorum required for meetings of the SMA. Direct investor's rights to requisition, attend and vote at meetings are mainly contained in the Corporations Act
- contains procedures for how complaints from direct investors are dealt with.

MISL's rights and obligations

In relation to MISL's powers, duties and liabilities as responsible entity of the SMA, the Constitution:

- allows MISL to refuse applications for investment, in whole or in part, at its discretion and without giving reasons
- allows MISL to terminate SMA Accounts, at its discretion and without giving reasons
- allows MISL to set a minimum investment to be made in the SMA
- allows MISL to extend the period for an investment withdrawal in certain circumstances
- provides that, subject to the Corporations Act, MISL is not liable to a direct investor beyond the value of the relevant SMA Account. The Constitution contains other indemnities and protections in favour of MISL
- allows MISL to change the Constitution, but only with direct investors' approval by special resolution if the change would adversely affect the rights of investors
- allows MISL to charge fees (described on pages 320 to 343) and recover all expenses it incurs in the proper performance of its duties in respect of the SMA
- gives MISL the right to terminate the SMA by notice to the Eligible Platform and where possible then transfer cash and/or securities to the Platform Account (please refer to your Eligible Platform provider for further information).

Please note that this is not an exhaustive list of MISL's rights under the Constitution.

3. Benefits of investing in the Macquarie Separately Managed Account

Compliance Plan

The SMA's compliance plan describes the procedures that apply in operating the SMA to ensure compliance with the Corporations Act and the Constitution.

3.2 Benefits

Transparency

You and your adviser can view all investments, transactions and fees securely online, allowing you to see exactly what you own and track changes in your SMA Account. This compares favourably to conventional managed funds, where you do not have full visibility of the underlying investments.

Portability

In some instances you can fund all or part of your SMA Account by transferring in an existing portfolio of securities from your Platform Account. If the transferred securities are retained as part of your selected SMA Model Portfolio, no capital gains tax (CGT) event occurs in relation to those securities. Furthermore, if you want to close your SMA Account, you may request to have your investments transferred back to your Platform Account, again without resulting in a CGT event, where a securities transfer to the Eligible Platform provider is permitted under the terms of that Eligible Platform. You should confirm with your Eligible Platform provider whether such securities transfers are permitted before requesting such a transfer. Please note that a Security Transfer Fee may apply.

Switching between SMA Model Portfolios is available provided that the value of your investments in the SMA Model Portfolios meets the Minimum Portfolio Size. Where common holdings exist, these holdings can be transferred, rather than selling and re-purchasing them, avoiding unnecessary realisation of capital gains or losses. This compares favourably with conventional managed funds which you can only fund with cash, and must sell when closing the account or switching between funds, with potentially unfavourable tax consequences. Refer to Section 5.9 for more information on switching between SMA Model Portfolios.

Customisations

The SMA allows you and your adviser to tailor your SMA Account in accordance with your individual investment preferences by placing 'do not hold' restrictions. Your adviser can help you identify the security or sector that best meets your investment considerations.

Rebates

An SMA Model Portfolio may receive a rebate of some or all of the investment cost of a managed fund held within that SMA Model Portfolio. Where a rebate is received, it will be paid into the cash holding within your SMA Model Portfolio.

The rebate you are entitled to receive is based on the average holding of assets in the relevant underlying managed fund within your SMA Model Portfolio over the rebate period. If your SMA Model Portfolio is fully redeemed prior to the processing of a rebate, you will not be entitled to that rebate.

Segregated tax position from other investors

When you hold securities in the SMA your tax position is your own, and it is not affected by the actions of other investors or transactions made prior to your investment. A new Portfolio of securities is established for you for each of the SMA Model Portfolios you select, and you have beneficial ownership of those securities,¹ so all income and any realised gains and losses flow directly to you. Franking credits may also flow to investors if certain conditions are satisfied. This may have significant tax implications, particularly when compared to conventional managed funds. In particular:

- in a managed fund, your tax position can be affected by the actions of other investors. For example, if a managed fund receives a large number of redemptions, the manager may be forced to sell some of the fund's assets and realise capital gains. These capital gains may be passed on to all investors in the fund. In other words, you may have to pay more tax or pay tax at a time that may not suit you because other investors have chosen to withdraw their money from the fund
- investing in managed funds can lead to the problem of embedded capital gains, whereby you inherit the tax position of the fund at the time of investment. This can lead to situations where you inherit a tax liability for actions the manager took before you invested in the fund.

Professional investment management

Your SMA Account is managed by us according to the SMA Model Portfolios provided by the Investment Managers (subject to 'implementation risk' as described in Section 4 of the Short Form PDS and provided that your investment meets the Minimum Portfolio Size condition). This relieves you of the burden of investment decision making, giving you comfort that a disciplined and consistent investment process is applied and that each SMA Model Portfolio is monitored and managed by the applicable Investment Manager.

Diversification

With the SMA, you have a choice of a range of SMA Model Portfolios, some of which are well diversified, and some of which are more concentrated. The more diversified the SMA Model Portfolio, the less over-exposed an investor is to the performance of any single investment holding.

¹ As an indirect investor, you should consult the offer documents provided by your Eligible Platform to determine whether beneficial ownership of SMA Account investments is affected by investing in the SMA through the platform.

3. Benefits of investing in the Macquarie Separately Managed Account

Hassle free ownership

Your Portfolio is administered on your behalf, including tax record keeping, receipt of dividends, mail, corporate actions, and reporting. That way, you receive the benefits of owning a portfolio of direct investments, without the administrative burden.

Suitability for self managed super funds

The SMA may be a suitable investment vehicle for trustees of self managed superannuation funds (SMSFs), relieving the administrator of much of the record keeping burden that results from holding investments directly. SMSF's should ensure that they understand and can accept the risks of the SMA, including 'implementation risk' as described in Section 4 of the Short Form PDS.

4. Risks of managed investment schemes

For information regarding the significant risks of the SMA please refer to Section 4 of the Short Form PDS.

There is no additional information relating to Section 4 of the Short Form PDS.

5. How we invest your money

The SMA offers a selection of Investment Managers and investment styles across the main asset classes, allowing you to tailor your choice of SMA Model Portfolio(s) to suit your investment needs.

You may choose one or a combination of SMA Model Portfolios. This Section provides information on the processes which are consistent across all SMA Model Portfolios. A summary of each SMA Model Portfolio is included in Section 5.17.

Over time, the investment menu may be developed to include additional SMA Model Portfolios provided by one or more investment managers covering a range of asset classes.

Some SMA Model Portfolios are restricted to specific financial advisory groups. Please contact the Investment Manager directly for more information.

5.1 Portfolio implementation

By establishing an SMA Account, you authorise MISL, as implementation manager, to implement all portfolio management decisions on your behalf relating to your Portfolio based on your chosen SMA Model Portfolio and customisations you have applied to your SMA Account. This authority includes us buying and selling securities and other investments, responding to corporate action elections, and making dividend elections, all of which may result in associated costs as disclosed in the Short Form PDS and Information Booklet.

The authority you provide MISL above does not in any way include any obligation to independently act to reduce or remove any of the risks associated with an investment in an SMA Model Portfolio.

5.2 Customisation

You may choose to apply a 'do not hold' customisation to the SMA Model Portfolio(s) you are, and will be, invested into.

A 'do not hold' customisation can be placed against specified securities or industry sectors (as defined by the Global Industry Classification Standard® (GICS®)). For 'do not hold' customisations placed on specified securities, the 'do not hold' will only be applied to the direct security holdings in an SMA Portfolio and will not be applied to the underlying investments of those securities. For example, you may place a "do not hold" customisation on shares in ABC Pty Ltd. To the extent that your selected Model Portfolios invest in ABC Pty Ltd, this will mean that your SMA Account will not hold ABC Pty Ltd. However if there are any managed funds in your SMA Model Portfolios that hold shares in ABC Pty Ltd, these indirect holdings are unable to be restricted and you may still have an indirect exposure to ABC Pty Ltd through the holding in the managed fund(s).

As the GICS® classification is only applied to companies, where you apply a 'do not hold' customisation on one or more specified GICS® sectors, the restriction will only be applied to direct listed equity holdings in your selected SMA Portfolio(s) which have been classified as being in the specified GICS® sector(s). A 'do not hold' customisation on one or more specified GICS® sectors will not apply to restrict indirect underlying investments in any companies in the specified GICS® sector(s) by, for example, any managed funds held in your Model Portfolio(s).

Customisations you have selected will only apply to your SMA Accounts and will not apply to your Platform Account.

The customisation will apply to all of the SMA Portfolios in your Platform Account (you can't apply the customisation to some SMA Model Portfolios and not others) and will apply to any new SMA Model Portfolio(s) you invest into and to current holdings within your SMA Model Portfolio(s). Once we have received your customisation instructions, we will endeavour to apply those customisations to your SMA Account as soon as reasonably practicable. Implementing your instructions may be delayed for a number of reasons, for example, where you hold illiquid investments in your current SMA Model Portfolio.

If you place a 'do not hold' customisation on an existing SMA Model Portfolio(s), this will be deemed as an instruction to sell all holdings to which the customisation applies at the time and in the future (including if securities are later transferred in).

It is important to understand that the application of such customisations may impact the actual performance of your Portfolio as compared with the SMA Model Portfolio due to your selected customisation.

Your financial adviser can help you to identify and apply appropriate customisations. It is important for you to discuss with your financial adviser the potential impact of any customisations selected on the performance of your SMA Model Portfolio.

You and your adviser will be responsible for the ongoing maintenance of the customisations selected. For example, if a security you have placed a 'do not hold' customisation on demerges, has a security code change or is taken over you will need to update your customisation list with any additional customisations on the new securities that may result. If you do not update your customisation list to include these new securities it is possible that they may be purchased in your SMA account as part of your Portfolio(s).

5. How we invest your money

Where you have selected to apply 'do not hold' customisations, you should note that changes may occur to your Portfolio(s) as companies move in or out of a sector or index. For example, a holding may need to be sold if the company becomes a member of one of your restricted industry sectors; likewise a holding may be created if the company is no longer a member of one of your restricted industry sectors.

New weights will be calculated for the securities unaffected by the customisation through the rebalancing process – see Section 5.5. This process will generate trades on non-restricted securities in your selected SMA Model Portfolio(s). It may also result in additional transactions in your SMA Account and a cash weighting that differs from the SMA Model Portfolio(s).

Where it has reasonable grounds for doing so, MISL may refuse the application of a customisation to an SMA Model Portfolio.

5.3 Corporate actions

MISL or its custodian will receive communications relating to corporate actions affecting the securities held in your Portfolio(s). For example the issuers of securities held in your Portfolio will send any corporate action notifications, dividend payments, and notices of meetings to us or our custodian.

The best interests of investors as a whole will be considered when dealing with corporate actions. The policy regarding corporate actions affecting securities held in the SMA is that generally we or our custodian will:

- elect to receive dividends and distributions in cash, which will be credited to your cash holdings within your relevant Portfolio or you may elect on your Eligible Platform to transfer this cash to your Platform Account
- adopt a neutral position and not vote at meetings of holders of securities, although it may exercise discretion and vote depending on the particular circumstances
- generally refer back to the relevant Investment Manager for corporate actions with an election component.

Customisations you have selected on your SMA Account(s) may restrict the application of a corporate action.

5.4 Minimum Portfolio Size

MISL has determined a Minimum Portfolio Size for each SMA Model Portfolio. Each Minimum Portfolio Size is determined by the investment mandate as agreed by MISL with the Investment Manager and by MISL having regard to its ability to implement the transactions to replicate the applicable SMA Model Portfolio as advised by the Investment Manager.

The ASX rules on the non-marketable trade parcel size (currently \$500) prevent us from implementing listed securities transactions which result in a holding with a value of less than the minimum parcel size from time to time under those ASX rules. This may result in your Portfolio not fully replicating the SMA Model Portfolio and having an excess cash holding and may result in or

contribute to 'implementation risk' as described in Section 4 of the Short Form PDS. This excess cash holding will be over and above the indicative cash holding as advised in the indicative asset allocation in the applicable SMA Model Portfolio profile.

The Minimum Portfolio Size aims to minimise these effects. Despite a Minimum Portfolio Size there may be situations where a Portfolio does not fully replicate the holdings of the SMA Model Portfolio as advised by the Investment Manager and provides an excess cash position.

The SMA Model Portfolio profiles in Section 5.17 will indicate what the Minimum Portfolio Size for each SMA Model Portfolio is.

Minimum Portfolio Sizes may change over time. Where a Minimum Portfolio Size is increased, this may result in your Portfolio not fully replicating the SMA Model Portfolio and having an excess cash holding and may result in or contribute to 'implementation risk' as described in Section 4 of the Short Form PDS. This excess cash holding will be over and above the indicative cash holding as advised in the indicative asset allocation in the applicable SMA Model Portfolio profile.

When the Minimum Portfolio Size of your SMA Model Portfolio is increased, your Eligible Platform provider will contact your financial adviser for instructions.

5.5 Rebalancing of Portfolios

The Investment Managers provide MISL with regular updates of SMA Model Portfolio holdings and weightings. Any changes to the SMA Model Portfolio will only be implemented by us once they are provided by the Investment Manager. On a regular basis, a 'rebalance' process is run to compare holdings of SMA Model Portfolios with the holdings in each of your corresponding Portfolios. Where there is a material difference, transactions will be generated to bring your Portfolios in line with their SMA Model Portfolios.

Generally, your Portfolio(s) will only be transacted:

- when the Investment Manager makes a material change to the holdings in the corresponding SMA Model Portfolio (for example, replaces one security with another)
- on a periodic basis, where market movement has caused the weighting of securities in your Portfolio to differ from the SMA Model Portfolio
- when cash or securities are contributed to the Portfolio
- when cash or securities are withdrawn from the Portfolio
- when the customisations on your SMA Account(s) are updated.

You should expect regular transactions for Portfolio(s), sometimes as often as several times per week.

Whilst the aim is to closely replicate the SMA Model Portfolio(s) provided by the Investment Manager, there will be times when this will not be possible. Examples include:

- if we are restricted from buying a particular security due to the requirements of the Corporations Act
- Macquarie Group imposed trading restrictions

- ASX Rules on non-marketable trade parcel size
- any restrictions on transacting in any managed fund
- the security is suspended from trading on the relevant securities exchange
- customisations you have selected on your SMA Account(s)
- where a security is unable to be held in an SMA Model Portfolio because we have determined that it is not consistent with how the SMA Model Portfolio has been described (please refer to Section 5.12 of the Information Booklet) or
- the security is no longer available for investment on the Eligible Platform.

Each Portfolio will maintain a cash balance in line with what has been notified by the Investment Manager as part of the SMA Model Portfolio weightings. Generally this cash balance is maintained at or above 1 per cent of the Portfolio's value, to ensure that there is sufficient cash to operate the Portfolio. An excess cash balance over and above this level may arise as a result of the ASX Rules on non-marketable trade parcels. The ASX rules governing non-marketable trade parcel size may prevent us from implementing listed securities transactions that result in a holding with a value of less than \$500 and may result in an excess cash position.

Where the cash balance falls below 1 per cent, your Portfolio may be rebalanced to bring it back up to 1 per cent.

5.6 Rebalancing and settlement

Each Portfolio within your SMA Account must contain sufficient funds to settle any transactions.

Where you have selected to apply customisations to your SMA Account, we will calculate new weights for the remaining unrestricted securities within each SMA Model Portfolio.

5.7 Trading

All SMA orders are aggregated for trading purposes, and executed through a broker (this may be a Macquarie Group entity related to MISL). When orders are completed, they are then disaggregated and applied to individual Portfolios. The average price for each order is calculated and applied to each Portfolio, so that each client Portfolio is treated equally.

Trades are booked on a daily basis. In some circumstances, it may not be possible to complete an order for a particular security on the same day, in which case a number of smaller trades will be executed on a daily basis until the transaction is complete. For example, as the result of an SMA Model Portfolio change 1,000 Company XYZ (**XYZ**) listed securities are required to be bought on your behalf. The order is unable to be completed on the same day, and therefore your XYZ trades may be executed over a number of days where appropriate. An example of this is as follows:

Day 1	Purchase 300 XYZ securities
Day 2	Purchase 200 XYZ securities
Day 3	Purchase 200 XYZ securities
Day 4	Purchase 300 XYZ securities
TOTAL	1,000 XYZ securities

5.8 Performance

The SMA Model Portfolios are based on the recommended portfolios provided by the Investment Managers. However, please note that there will be differences between the performance of the strategies, the recommended portfolios provided by the Investment Managers and client Portfolios, because of factors such as:

- differences in fees charged
- differences in timing of, and prices received for, buy and sell transactions
- cashflows from contributions and withdrawals (including dividends, distributions, other corporate action proceeds and interest)
- differences in timing between when an Investment Manager makes changes to the portfolio and when the Investment Manager notifies us of those changes
- differences in holdings (for example, if we are restricted from buying a particular security due to Corporations Act requirements or where a security is unable to be held in an SMA Model Portfolio because we have determined that it is not consistent with how the SMA Model Portfolio has been described (please refer to Section 5.12 of the Information Booklet))
- Macquarie Group imposed trading restrictions
- any trading or other restrictions imposed by the Eligible Platform (which may prevent the purchase or require the sale of a security)
- where an SMA Model Portfolio is based on an existing managed fund, differences between the managed fund and the SMA Model Portfolio
- any differences in weights of holdings due to us not being able to implement the SMA Model Portfolio as advised by the Investment Manager due to non-marketable trade parcel sizes
- any customisation you select.

Past performance is not a reliable indicator of future performance. You should read the Short Form PDS and this Information Booklet in their entirety, before choosing to invest in the SMA.

5.9 Switching between SMA Model Portfolios

Switching between SMA Model Portfolios is available provided that the value of your investments in the SMA Model Portfolios meets the Minimum Portfolio Size.

For switching between SMA Model Portfolios, please follow the instructions from your Eligible Platform provider.

Please note that sales of investments may give rise to tax consequences. See Section 7 of this Information Booklet for more information.

5. How we invest your money

5.10 Changes to SMA Model Portfolios

The list of available SMA Model Portfolios and their characteristics may change from time to time. You should check this Information Booklet for the most up to date information. Where this happens to your selected SMA Model Portfolio(s), your financial adviser will be notified of the change. Please note, however, that the Investment Manager retains the right to vary SMA Model Portfolios at any time without reference to you.

5.11 Termination of SMA Model Portfolios

Where an SMA Model Portfolio that you are invested into is to be discontinued, your financial adviser will be contacted and requested to provide instructions within 30 days. During this period, portfolio management (refer to Section 5.1) will continue.

In the event that an SMA Model Portfolio you are invested in is terminated with immediate effect, your financial adviser will be contacted and requested to provide instructions within 30 days, unless MISL exercises discretion to reduce or remove this notice period in the best interests of clients. During this period we will have no obligation to provide portfolio management (refer to Section 5.1) with respect to the SMA Model Portfolio.

New Investment Managers and SMA Model Portfolios may be added to replace terminated Investment Managers and SMA Model Portfolios.

When seeking instructions, your financial adviser will be notified of any new investment options and informed if an alternative Model Portfolio has been nominated for the SMA Model Portfolio. If your financial adviser has not responded with instructions per the timeframes above, you will be taken to have provided an instruction to switch to that alternative and nominated SMA Model Portfolio. If an alternative SMA Model Portfolio has not been nominated, then unless you provide us with instructions to the contrary, you will be taken to have provided an instruction to transfer or sell your investments in that SMA Model Portfolio to your Platform Account.

5.12 Labour standards or environmental, social or ethical considerations

Unless expressly stated in the SMA Model Portfolio profiles, the Investment Managers do not take labour standards or environmental, social or ethical considerations into account in selecting, retaining or realising the investments within the SMA Model Portfolios. Investment Managers may also use negative screens and positive screens based on their own environmental, social, governance (ESG) and ethical policies as described in their SMA Model Portfolio profile (please refer to Section 5.17 of the Information Booklet).

5.13 Clearing and settlement accounts

Any clearing or settlement accounts that are used in relation to the SMA are either non interest bearing, or where interest is earned, this will be retained by members of the Macquarie Group.

5.14 Potential conflicts of interest

MISL is a wholly owned subsidiary of Macquarie Group Limited, a diversified financial institution. MISL, as responsible entity, makes its investment decisions separately from the activities of other members of the Macquarie Group.

The SMA Model Portfolios and indices to which the SMA Model Portfolios relate may include securities or other financial products issued by members of the Macquarie Group. As a result, the Macquarie Group's activities may have an effect on the SMA Model Portfolios. MISL makes no representation as to the future performance of any securities held in the SMA Model Portfolios, including those issued by members of the Macquarie Group.

MISL, other members of the Macquarie Group and their directors and employees may hold, buy or sell shares or other financial products in the funds or listed entities forming part of the SMA Model Portfolios.

Members of the Macquarie Group may have business relationships (including joint ventures) with the Investment Managers or any of the funds or listed entities included in the SMA Model Portfolios. Eligible Platform providers may include members of the Macquarie Group. In addition, members of the Macquarie Group may from time to time advise the Investment Managers or any of the funds or listed entities included in the SMA Model Portfolios in relation to activities unconnected with the SMA. Such relationships and advisory roles may include:

- acting as manager or joint lead manager in relation to the offering or placement of rights, options or other securities including shares
- underwriting the offering or placement of rights, options or other securities including shares
- advising in relation to mergers, acquisitions or takeover offers, and
- acting as general financial adviser in respect of, without limitation, corporate advice, financing, funds management, property and other services.

The directors and employees of MISL and other members of the Macquarie Group may hold directorships in the listed entities or funds included in the SMA Model Portfolios.

Any confidential information received by Macquarie Group and its directors and employees as a result of the business relationships, advisory roles and directorships discussed above will not be made available to MISL.

These activities may have an effect on the performance of the SMA.

5.15 Deceased estates

In the event of your death:

- applicable management fees will continue to be deducted until your SMA Account is closed by your legal personal representative or any other person who we recognise as having a claim to your SMA Account, eg an executor or administrator appointed to manage your estate, and

- your investments will continue to be invested in accordance with your selected SMA Model Portfolio(s), until otherwise instructed by a properly authorised person. When an SMA Account is held in joint names and one account holder dies the credit balance in the SMA Account will be treated as owing to the surviving account holders.

5.16 Standard Risk Measure

The Standard Risk Measure (**SRM**) has been developed by the Association of Superannuation Funds of Australia (**ASFA**) and the Financial Services Council (**FSC**) at the request of Australian Prudential Regulation Authority (**APRA**).

The purpose of the SRM is to disclose the level of risk using a standard measure. It allows members to compare investments both within and between funds based on the likely number of negative annual returns over any twenty year period.

Risk band	Risk label	Estimated number of negative returns over any 20 year period
1	Very Low	Less than 0.5
2	Low	0.5 to less than 1
3	Low to Medium	1 to less than 2
4	Medium	2 to less than 3
5	Medium to High	3 to less than 4
6	High	4 to less than 6
7	Very High	6 or greater

As shown above, a risk band of 1 would suggest that the investment is the least risky investment, and a risk band of 7 suggests a very risky investment.

The SRM Ratings for an SMA Model Portfolio may change from time to time. Where this information changes this will be available online at macquarie.com.au/smawpds.

Activam Balanced

Code	SMAACT01S
Investment Manager	Activam Group Pty Ltd
Style	Balanced
Indicative number of holdings	20 to 60
Suggested minimum investment timeframe	7+ years
Investment return objective	This portfolio aims to deliver a rate of return that exceeds inflation (consumer price index) by at least 2% per annum over a rolling 7-year period.
Who should invest	This portfolio suits investors who are willing to accept moderate investment volatility in return for potential investment performance whilst desiring a modest level of capital stability. This portfolio is suitable for investors with medium-term investment time frame.
Description	The Activam Balanced Model Portfolio is an actively managed diversified portfolio of funds across growth asset classes (e.g., Australian equities, international equities, property, infrastructure) and defensive asset classes (e.g., fixed interest, cash). This portfolio will target an average long-term exposure of approximately 70% growth assets and 30% defensive assets; however, the actual asset class allocations will be determined by Activam's views on the macroeconomic and earnings environment, market conditions and cycles, and actively managed within the allowable ranges.
Indicative asset allocation	<div> <div>Australian equities:</div> <div>15% to 60%</div> </div> <div> <div>International equities:</div> <div>15% to 60%</div> </div> <div> <div>Australian fixed interest:</div> <div>3% to 33%</div> </div> <div> <div>International fixed interest:</div> <div>3% to 33%</div> </div> <div> <div>Property and Infrastructure:</div> <div>0% to 20%</div> </div> <div> <div>Alternative investments:</div> <div>0% to 25%</div> </div> <div> <div>Cash:</div> <div>2% to 33%</div> </div>
Benchmark	Morningstar Australia Growth Target Allocation NR AUD
Risk level	High

Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

5. How we invest your money

Activam Conservative and Income

Code	SMAACT02S
Investment Manager	Activam Group Pty Ltd
Style	Defensive
Indicative number of holdings	20 to 60
Suggested minimum investment timeframe	3+ years
Investment return objective	This portfolio aims to deliver a rate of return that exceeds inflation (consumer price index) by at least 1% per annum over a rolling 3-year period
Who should invest	This portfolio suits investors who want to preserve their capital and are very conservative. They have low to moderate risk tolerances and are looking for a way to earn a steady income.
Description	The Activam Conservative and Income Model Portfolio is an actively managed diversified portfolio of funds across growth asset classes (e.g., Australian equities, international equities, property, infrastructure) and defensive asset classes (e.g. fixed interest, cash). This portfolio will target an average long-term exposure of approximately 20% growth assets and 80% defensive assets; however, the actual asset class allocations will be determined by Activam's' views on the macroeconomic and earnings environment, market conditions and cycles, and actively managed within the allowable ranges.

Acuity Balanced

Code	SMAATR01S
Investment Manager	Atrium Investment Management Pty Ltd
Style	Diversified
Indicative number of holdings	20 to 40
Suggested minimum investment timeframe	5 – 7 years
Investment return objective	The portfolio aims to generate moderate growth by investing in income and growth assets, over the medium to long term of 5 to 7 years, with risk management through diversification and active management.
Who should invest	Designed for investors with a medium to high appetite for risk, seeking capital growth and regular income.
Description	The Acuity Balanced Model Portfolio aims to achieve the investment objective by investing across a genuinely diversified mix of Australian and global shares and other diversifying strategies such as bonds (rates and credit) and alternatives that are focused on quality, and generating positive returns through the cycle, while retaining the flexibility to reduce risk or take advantage of opportunities in markets.
Indicative asset allocation	<div> <div>Australian Equities:</div> <div>10% to 70%</div> </div> <div> <div>International Equities:</div> <div>10% to 70%</div> </div> <div> <div>Australian Fixed Interest:</div> <div>0% to 30%</div> </div> <div> <div>International Fixed Interest:</div> <div>0% to 30%</div> </div> <div> <div>Alternatives and Multi Asset:</div> <div>10% to 30%</div> </div> <div> <div>Cash:</div> <div>1% to 30%</div> </div>

5. How we invest your money

Acuity Growth

Code	SMAATR02S												
Investment Manager	Atrium Investment Management Pty Ltd												
Style	Diversified												
Indicative number of holdings	20 to 40												
Suggested minimum investment timeframe	7+ years												
Investment return objective	The portfolio aims to generate equity-like returns over the long term of 7+ years with a lower level of risk than equities through diversification and active management.												
Who should invest	Designed for investors with a high appetite for risk, seeking returns predominantly through capital growth.												
Description	The Acuity Growth Model Portfolio aims to achieve the investment objective by investing across a genuinely diversified mix of Australian and global shares and other diversifying strategies such as bonds (rates and credit) and alternatives that are focused on quality, and generating positive returns through the cycle, while retaining the flexibility to reduce risk or take advantage of opportunities in markets.

Altitude Global High Growth

Code	SMATAM01S
Investment Manager	Thesan Asset Management Pty Ltd
Style	Long only, high growth, active global equities.
Indicative number of holdings	20 to 40
Suggested minimum investment timeframe	5+ years
Investment return objective	Outperform a blended index of 50% All Ordinaries Index and 50% MSCI World Index
Who should invest	Those who are looking for a well-diversified, long-term, growth-oriented portfolio with exposure to Australian and International Equities.
Description	An actively-managed, high-growth, and diversified portfolio of securities, ETFs and Managed Funds across Australian and international equities. The SMA's Australian exposure consists of individual stocks, ETFs and Managed Funds, while the international exposure incorporates ETFs and Managed Funds only. The portfolio is characterised as 'high-growth' given that the primary exposure is to equities. It is expected that the composition of the portfolio is relatively stable with the possible exception of Australian individual stock holdings.
Indicative asset allocation	<div> <div>Australian Equities:</div> <div>20% to 60%</div> </div> <div> <div>International Equities:</div> <div>30% to 75%</div> </div> <div> <div>Australian Fixed Interest:</div> <div>0% to 5%</div> </div> <div> <div>International Fixed Interest:</div> <div>0% to 5%</div> </div> <div> <div>Property:</div> <div>0% to 5%</div> </div> <div> <div>Cash:</div> <div>2% to 10%</div> </div>
Benchmark	Blended Index: 50% MSCI World, 50% All Ordinaries
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$70,000. Refer to section 5.4 for more information on Minimum Portfolio Size.

5. How we invest your money

Antares Dividend Builder

Code	SMAANT02S
Investment Manager	Antares Capital Partners Limited
Style	Style Agnostic
Indicative number of holdings	10 to 30
Suggested minimum investment timeframe	5+ years
Investment return objective	Aims to generate higher levels of dividend income than the S&P/ASX 200 Total Return Index and moderate capital growth over rolling 5-year periods.
Who should invest	The Antares Dividend Builder Model Portfolio is designed for investors seeking a stable, tax effective income stream through participating in the Australian share market and investing in companies providing dividend growth. It may also act as an income stabiliser in investment portfolios, especially during shifting or uncertain markets.
Description	A diversified portfolio of high yielding Australian shares that will grow their dividends over time, with an emphasis on securing franked income and minimising share turnover to keep net realised capital gains low. Antares' investment philosophy is based on the premise that the pricing of individual stocks in the Australian share market is at times inefficient. Antares believes these inefficiencies can be exploited through bottom-up stock selection.
Indicative asset allocation	Australian equities: 85% to 99% Cash: 1% to 15%
Benchmark	S&P/ASX 200 Total Return Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Antares Elite Opportunities

Code	SMAANT01S
Investment Manager	Antares Capital Partners Limited
Style	Style Agnostic, selectively contrarian
Indicative number of holdings	10 to 35
Suggested minimum investment timeframe	5+ years
Investment return objective	Aims to outperform the S&P/ASX 200 Accumulation Index after investment fees over rolling five year periods.
Who should invest	The concentrated nature of the Antares Elite Opportunities Model Portfolio means that there may be a greater level of risk and returns may be quite volatile. As such, this SMA Model Portfolio may suit investors who are willing to accept a higher level of risk in exchange for the opportunity to earn greater returns.
Description	The Antares Elite Opportunities Model Portfolio is an actively managed, highly concentrated portfolio of Australian shares that Antares has identified as having the potential to offer significant long term capital growth. The approach to stock selection is bottom-up, and is focused on identifying companies where the potential value of each company's business is not fully reflected in the current share price. The portfolio manager draws on the research of the broader equities team as an input into stock selection and portfolio construction.
Indicative asset allocation	Australian equities: 90% to 99% Cash: 1% to 10%
Benchmark	S&P/ASX 200 Total Return Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

5. How we invest your money

Antares Ex-20 Australian Equities

Code	SMAANT03S
Investment Manager	Antares Capital Partners Limited
Style	Style Agnostic
Indicative number of holdings	10 to 30
Suggested minimum investment timeframe	5+ years
Investment return objective	Aims to outperform the total return of the S&P/ASX 200 Accumulation Index excluding shares listed in the S&P/ASX 20 Accumulation Index after investment fees over rolling 5-year periods.
Who should invest	The Antares Ex-20 Australian Equities Model Portfolio is designed for investors seeking long term capital growth through an actively managed, highly concentrated portfolio of Australian securities that excludes the top 20 stocks by market capitalisation.
Description	<p>The Antares Ex-20 Australian Equities Model Portfolio is an actively managed, highly concentrated portfolio of Australian equities. It primarily invests in shares from outside of the largest 20 companies by market capitalisation that Antares identifies as having the potential to offer significant long term capital growth. At times the portfolio may hold stocks listed in the S&P/ASX 20 Accumulation Index.</p> <p>Antares' investment philosophy is based on the premise that the pricing of individual stocks in the Australian share market is at times inefficient. Antares believes these inefficiencies can be exploited through bottom-up stock selection.</p>
Indicative asset allocation	Australian equities: 90% to 99% Cash: 1% to 10%
Benchmark	S&P/ASX 200 Accumulation Index excluding the S&P/ASX 20 Leaders Accumulation Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Boutique Responsible Investment

Code	SMAZEN17S														
Investment Manager	Zenith Investment Partners Pty Ltd														
Style	Neutral														
Indicative number of holdings	5 to 30														
Suggested minimum investment timeframe	7 years														
Investment return objective	The objective of this Portfolio is to outperform the Ausbond Bank Bills index by 4.00% p.a. over an investment timeframe of 7 Years.														
Who should invest	Designed for investors seeking cash plus returns with a focus on responsible investing principles.														
Description	<p>The Portfolio invests across a diversified range of Australian shares, international shares, property, infrastructure, fixed interest and alternative assets. The Portfolio will generally invest in managed funds but can also invest in listed securities, other managed portfolios, exchanged traded funds (ETFs) and cash. The Portfolio also seeks to incorporate responsible investment principles where possible. Zenith defines responsible investment as the practice of incorporating environmental, social and governance (ESG) factors in investment decisions. In constructing portfolios, Zenith seeks to prioritise strategies they believe have a strong commitment to responsible investment principles as defined by Zenith's Responsible Investment Classifications. For further information please refer to Zenith's Responsible Investment Framework at www.zenithpartners.com.au via Our Solutions/Investment Research.</p> <p>These classifications are designed to consistently identify a fund manager's approach to ESG incorporation. It also aids in the identification of those funds which are likely to place a higher priority on responsible investment outcomes for further scrutiny.</p> <p>In constructing portfolios, where possible Zenith seeks to minimise exposure to certain industries by selecting funds which have mandates to limit these exposures, including Tobacco, Alcohol, Gambling, Weapons, Adult Entertainment, and Fossil Fuels.</p>

5. How we invest your money

CA - Accumulation 85

Code	SMAQUI27S		
Investment Manager	Quilla Consulting Pty Ltd		
Style	Accumulation		
Indicative number of holdings	10 to 30		
Suggested minimum investment timeframe	7+ year		
Investment return objective	To deliver an investment return of 4.00% pa above inflation, after fees, over rolling 7-year periods. Inflation is defined as the Reserve Bank of Australia’s trimmed mean measure.		
Who should invest	Designed for investors seeking above average growth and who can tolerate potentially significant up or down movement in the capital value of the portfolio.		
Description	An actively managed diversified portfolio of investments across growth asset classes such as Australian equities, property and global securities, and income-oriented asset classes, such as cash and fixed interest securities. In general, the Portfolio will hold around 85% in growth and alternative assets and 15% in income assets. However, these allocations will be actively managed within the allowable ranges depending on market conditions.		
Indicative asset allocation	Cash:	1% to 21%	
	Australian fixed interest:	0% to 22%	
	International fixed interest:	0% to 22%	
	Australian Property:	0% to 20%	
	International Property:	0% to 20%	
	Australian shares:	25% to 50%

CA - Retirement 85

Code	SMAQUI28S	
Investment Manager	Quilla Consulting Pty Ltd	
Style	Accumulation	
Indicative number of holdings	10 to 30	
Suggested minimum investment timeframe	7+ year	
Investment return objective	To deliver an investment return of 4.00% pa above inflation, after fees, over rolling 7-year periods. Inflation is defined as the Reserve Bank of Australia's trimmed mean measure.	
Who should invest	Designed for investors seeking higher returns, derived predominately from income and from a diversified portfolio of mainly growth assets. This is combined with sensible management of risk and return using predominantly active strategies.	
Description	An actively managed diversified portfolio of investments across growth asset classes such as Australian equities, property and global securities, and income-oriented asset classes, such as cash and fixed interest securities. In general, the Portfolio will hold around 85% in growth and alternative assets and 15% in income assets. However, these allocations will be actively managed within the allowable ranges depending on market conditions.	
Indicative asset allocation	Cash: 1% to 21% Australian fixed interest: 0% to 22% International fixed interest: 0% to 22% Australian Property: 0% to 20% International Property: 0% to 20% Australian shares: 25% to 50% International shares: 25% to 50% Other/Alternatives: 0% to 30%	
Benchmark	CPI +4%	
Risk level	Growth	
Standard Risk Measure	6	
Minimum Portfolio Size	\$25,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Suggested minimum investment timeframe	4+ years
Investment return objective	To provide a total return, consisting of capital appreciation and income, by gaining exposure to a diversified portfolio of securities listed on approved developed and emerging markets, and domestic and global fixed interest securities.
Who should invest	The Dimensional Sustainability Balanced Model Portfolio may suit those investors seeking exposure to a diversified portfolio with a balanced exposure to equity and fixed interest assets while taking into account certain sustainability considerations.
Description	The Dimensional Sustainability Balanced Model Portfolio will invest in other funds managed by DFA Australia Ltd that invest in equity and fixed interest securities. The Model Portfolio will seek to target approximately 60% exposure to equities (including real estate securities) and 40% exposure to fixed interest (including cash). The actual exposure may vary from the target exposure due to trading, portfolio management or market considerations. It is intended that, within the Model Portfolio's equities exposure, the weighting to Australian equities will be significantly greater than this asset class would represent if it were weighted according to its relative market value in relation to other countries. Dimensional takes certain environmental and social considerations into account when selecting, retaining or realising investments of the underlying funds.
Indicative asset allocation	<div>Australian equities: 5% to 25%</div> <div>International equities: 35% to 55%</div> <div>International fixed interest: 30% to 50%</div> <div>Cash: 1% to 5%</div>
Benchmark	Composite Benchmark
Risk level	Medium to High
Standard Risk Measure	5
Minimum Portfolio Size	\$5,000. Refer to section 5.4 for more information on Minimum Portfolio Size.

Dimensional Sustainability Growth

Code	SMADFA02S
Investment Manager	DFA Australia Limited
Style	Active/Systematic
Indicative number of holdings	4 to 10
Suggested minimum investment timeframe	5+ years
Investment return objective	To provide a total return, consisting of capital appreciation and income, by gaining exposure to a diversified portfolio of securities listed on approved developed and emerging markets, and domestic and global fixed interest securities.
Who should invest	The Dimensional Sustainability Growth Model Portfolio may suit those investors seeking exposure to a diversified portfolio primarily invested in equities while taking into account certain sustainability considerations.
Description	The Dimensional Sustainability Growth Model Portfolio will invest in other funds managed by DFA Australia Ltd that invest in equity and fixed interest securities. The Model Portfolio will seek to target approximately 80% exposure to equities (including real estate securities) and 20% exposure to fixed interest (including cash). The actual exposure may vary from the target exposure due to trading, portfolio management or market considerations. It is intended that, within the Model Portfolio's equities exposure, the weighting to Australian equities will be significantly greater than this asset class would represent if it were weighted according to its relative market value in relation to other countries. Dimensional takes certain environmental and social considerations into account when selecting, retaining, or realising investments of the underlying funds.
Indicative asset allocation	<div>Australian equities: 10% to 30%</div> <div>International equities: 50% to 70%</div> <div>International fixed interest: 10% to 30%</div> <div>Cash: 1% to 5%</div>
Benchmark	Composite Benchmark
Risk level	High
Standard Risk Measure	6

DNR Capital Australian Equities Income

Code	SMADNR03S
Investment Manager	DNR Capital Pty Ltd
Style	Style neutral (ie no specific style bias)
Indicative number of holdings	15 to 30
Suggested minimum investment timeframe	5+ years
Investment return objective	To outperform the S&P/ASX 200 Industrials Accumulation Index over a rolling three year period and deliver levels of income above the S&P/ASX 200 Industrials Accumulation Index.
Who should invest	Investors who seek a greater level of income and who can make use of franking credits.
Description	<p>DNR Capital believes a focus on quality will enhance returns when it is combined with a thorough valuation overlay. DNR Capital seeks to identify quality companies that are mispriced by overlaying a quality filter, referred to as the 'Quality Web', with a strong valuation discipline.</p> <p>The stock selection process has a strong bottom-up discipline and focuses on buying quality companies at reasonable prices.</p> <p>The DNR Capital Australian Equities Income Model Portfolio also has a preference for companies that have high and sustainable and growing dividend capability, strong profit to cash conversion, a robust balance sheet, and relatively assured earnings growth. Companies that generate franking credits or capital management potential predominate.</p> <p>The portfolio construction process is influenced by a top-down economic appraisal and also considers the risk characteristics of the portfolio such as stock and sector correlations.</p>
Indicative asset allocation	Australian equities: 80% to 98.5% Cash: 1.5% to 20%
Benchmark	S&P ASX 200 Industrials Accumulation Index
Risk level	Very High

Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Drummond 100 Plus

Code	SMADRC10S																
Investment Manager	Drummond Capital Partners Pty Ltd																
Style	Multi-asset																
Indicative number of holdings	8 to 40																
Suggested minimum investment timeframe	9+ years																
Investment return objective	To outperform the benchmark, after fees, over a rolling nine year period.																
Who should invest	Seek high capital growth potential by investing in a diversified, unconstrained, high growth strategy with exposure to leveraged / geared assets. They are prepared to accept a very high level of risk to achieve this objective																
Description	The portfolio is an actively managed diversified mix of predominantly growth assets and can include exposure to internally geared products. Drummond also uses tactical asset allocation to tilt the portfolio away from the neutral allocation over shorter time frames. In general, the portfolio's long term exposure will be around 2% defensive assets and 98% in growth assets. However, the tactical asset allocation overlay adopted by Drummond allows for deviation in long term average within +/- 10%.																
Indicative asset allocation	<table> <tr> <td>Australian equities:</td><td>10% to 50%</td></tr> <tr> <td>International equities:</td><td>10% to 80%</td></tr> <tr> <td>Australian fixed interest:</td><td>0% to 10%</td></tr> <tr> <td>International fixed interest:</td><td>0% to 10%</td></tr> <tr> <td>Hybrids</td><td>0% to 10%</td></tr> <tr> <td>Property</td><td>0% to 50%</td></tr> <tr> <td>Alternative investments:</td><td>0% to 60%</td></tr> <tr> <td>Cash:</td><td>2% to 10%</td></tr> </table>	Australian equities:	10% to 50%	International equities:	10% to 80%	Australian fixed interest:	0% to 10%	International fixed interest:	0% to 10%	Hybrids	0% to 10%	Property	0% to 50%	Alternative investments:	0% to 60%	Cash:	2% to 10%

Drummond Dynamic

Code	SMADRC12S		
Investment Manager	Drummond Capital Partners Pty Ltd		
Style	Multi-asset		
Indicative number of holdings	8 to 40		
Suggested minimum investment timeframe	5+ years		
Investment return objective	To deliver an investment return in line with the benchmark, after fees, over a rolling five-year period.		
Who should invest	Seek return above inflation with some capital growth by investing in a diversified portfolio. They are prepared to accept a high level of risk to achieve this objective.		
Description	<p>The portfolio is a goals based portfolio that tactically adjusts the level of risk taken (via growth assets such as Australian and international shares, listed property infrastructure) in order to achieve its targeted return. The portfolio has a dual objective of the target return, whilst maintaining a strong focus on downside risk management. To achieve this dual objective, the portfolio has a flexible asset allocation strategy. This enables Drummond to take advantage of opportunities as they arise, participating in the long-term asset growth when times are good and conversely protecting capital by moving to defensive assets (such as cash and fixed interest) during negative periods.</p> <p>In general, the portfolio's long term average exposure will be around 50% defensive assets and around 50% in growth assets. However, the portfolio's strategy is relatively unconstrained and actual asset allocation can deviate from the long-term average position within +/- 40%.</p>		
Indicative asset allocation	Australian equities:	10% to 40%	
	International equities:	10% to 80%	
	Australian fixed interest:	0% to 80%

5. How we invest your money

Exelsuper Balanced

Code	SMAACT07S
Investment Manager	Activam Group Pty Ltd
Style	Balanced
Indicative number of holdings	20 to 60
Suggested minimum investment timeframe	7 years
Investment return objective	This portfolio aims to deliver a rate of return that exceeds inflation (consumer price index) by at least 2% per annum over a rolling 7-year period.
Who should invest	This portfolio suits investors who are willing to accept moderate investment volatility in return for potential investment performance whilst desiring a modest level of capital stability. This portfolio is suitable for investors with medium-term investment time frame.
Description	The Exelsuper Balanced portfolio is an actively managed diversified portfolio of funds across growth asset classes including Australian equities, international equities, property, and infrastructure as well as defensive asset classes including fixed interest, and cash. This portfolio will target an average long-term exposure of approximately 70% growth assets and 30% defensive assets; however, the actual asset class allocations will be determined by Activam's views on the macroeconomic and earnings environment, market conditions and cycles, and actively managed within the allowable ranges.

Hyperion High Conviction Large Cap ASX 300

Code	SMAHYP01S
Investment Manager	Hyperion Asset Management Limited
Style	Growth Orientated with Sound Competitive Advantage (GOSCA)
Indicative number of holdings	15 to 30
Suggested minimum investment timeframe	5+ years
Investment return objective	To invest in high calibre listed Australian companies primarily listed within the S&P/ASX 300 at the time of investment. This is quantified by a performance objective to achieve 3% above the S&P ASX 300 Accumulation Index over rolling five-year periods.
Who should invest	Investors with a longer term investment horizon of five years or more, with the ability to tolerate investment performance which will, at times, be considerably different to that of the benchmark.
Description	<p>Hyperion believes the highest quality businesses with the strongest competitive advantages and organic growth opportunities produce superior shareholder returns over the long term.</p> <p>Hyperion also believes that equity investments should be able to outperform the return on a term deposit over rolling five year periods.</p> <p>The investment strategy of the Hyperion High Conviction Large Cap ASX 300 Model Portfolio is based around investing only in the highest quality organic growth companies. Hyperion calls this investment style “Growth Orientated with Sound Competitive Advantage” (GOSCA). For grouping purposes its investment style is similar to that of an active growth manager but it has a heavy quality component and the growth must be organically driven. Hyperion’s style is driven by expected long-term returns and business quality rather than company size or benchmark weighting. Hyperion would further assess itself as bottom-up, fundamental stock pickers focused on delivering high alpha portfolios.</p>
Indicative asset allocation	Australian equities: 80% to 98.5% Cash: 1.5% to 20%
Benchmark	S&P ASX 300 Accumulation Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

iShares ESG Moderate

Code	SMABLK09S														
Investment Manager	Blackrock Investment Management (Australia) Limited														
Style	Index														
Indicative number of holdings	5 to 15														
Suggested minimum investment timeframe	5 years														
Investment return objective	To match or outperform a long-run, composite moderate multi-asset class benchmark, while incorporating sustainability and Environmental Social and Governance (ESG) considerations, over rolling 5-year periods.														
Who should invest	Designed for investors who seek access to a low cost, diversified portfolio of predominately exchange traded funds (ETFs), targeting equal or better benchmark returns within a risk controlled framework, with a focus on ESG considerations.														
Description	<p>The portfolio is designed as a long-term strategic portfolio, constructed using predominately ETFs and index funds to diversify across asset classes and incorporate sustainability and ESG considerations. The portfolio seeks to optimally balance long-term returns and risk in line with the target allocation profile. BlackRock's approach to portfolio construction has a strong focus on risk across market conditions. Over the long term, the portfolio aims to have an average target exposure of around 30% in growth assets and 70% in defensive assets.</p> <p>Sustainability and ESG considerations are incorporated into the portfolio at different levels:</p> <ol style="list-style-type: none"> 1. When selecting the appropriate asset class building blocks; BlackRock uses ESG-screened/ESG-optimised index funds to gain asset class exposures. The underlying ETFs and index funds: <ul style="list-style-type: none"> – Avoid exposure to controversial sectors including but not limited to Alcohol, Gambling, Tobacco, Controversial Weapons and Fossil Fuel reserves through the use of exclusionary screens. These screens are defined by the MSCI ESG Leaders Index methodology for equities and Bloomberg MSCI SRI Index methodology for fixed income. – Avoid exposure to companies involved in serious controversies as measured by MSCI's Controversy Score. – Select/overweight the top ESG performers in each sector, while considering concentration risk and diversification as defined by MSCI. 2. 5. How we invest your money

JBWere Income

Code	SMAJBW02S
Investment Manager	JBWere Limited
Style	Equity income (focus on current dividend income in addition to moderate capital appreciation)
Indicative number of holdings	15 to 25
Suggested minimum investment timeframe	5+ years
Investment return objective	To enhance the value of the investment capital by generating combined capital and income returns that exceed the rate of inflation over the longer term (five years plus). The JBWere Income Model Portfolio aims to produce a consistent income stream, with a dividend yield target of 1% higher than that of the S&P/ASX200 Accumulation Index.
Who should invest	Investors who want access to consistent income streams with a portfolio yield greater than the benchmark.
Description	<p>The JBWere Income Model Portfolio is benchmark aware and JBWere uses stock selection and portfolio construction to obtain an outcome that is defensive in nature with a dividend yield higher than the benchmark.</p> <p>Reflecting the nature and focus on delivering a consistent income stream, this SMA Model Portfolio is likely to have a greater component of income relative to capital gain in comparison to the S&P/ASX 200 Accumulation Index.</p>
Indicative asset allocation	Australian equities: 90% to 98.5% Cash: 1.5% to 10%
Benchmark	S&P ASX 200 Accumulation Index
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$25,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

JBWere Listed Fixed Income

Code	SMAJBW03S
Investment Manager	JBWere Limited
Style	Income (focus on current distributions income in addition to moderate capital appreciation)
Indicative number of holdings	10 to 25
Suggested minimum investment timeframe	5+ years
Investment return objective	<p>Within the investable universe of ASX-listed income instruments, to construct a relatively defensive portfolio that has a capital preservation focus and aims to:</p> <ul style="list-style-type: none"> • exhibit a low level of capital and return volatility • adequately reward the investor for the credit, market and liquidity risks assumed • provide a steady and secure income stream • provide a solid absolute return that represents a premium to rates earned on term deposits is liquid enough to ensure sufficient investing flexibility.
Who should invest	Investors who are looking for a well-researched, transparent and defensive-orientated income portfolio constructed in accordance with JBWere's Charter of Investment Independence.
Description	<p>The JBWere Listed Income Securities Model Portfolio is designed to be a relatively defensive portfolio that invests in ASX listed Hybrid securities.</p> <p>To ensure the best opportunity to meet the portfolio's objectives JBWere focuses on the following investment selection criteria:</p> <ul style="list-style-type: none"> • investment grade credit quality • expected level and reliability of coupon payments • adequacy of the trading margin • liquidity of the issue • visibility of maturity • a value triggering event. <p>Reflective of its focus as a defensive investment, this SMA Model Portfolio is not expected to be a heavily-traded portfolio. Moreover, the general approach is to hold instruments to maturity; however, portfolio changes will be made in response to developments including:</p> <ul style="list-style-type: none"> • changes in JBWere's tactical view • adverse changes in the credit quality of individual issuers or instruments • redemptions • compelling relative value opportunities.
Indicative asset allocation	<p>Australian Hybrid securities: 85% to 98.5%</p> <p>Cash: 1.5% to 15%</p>
Benchmark	Benchmark unaware
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$25,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

5. How we invest your money

Lonsec Australian Equity Core

Code	SMALON01S
Investment Manager	Lonsec Investment Solutions Pty Ltd
Style	Quality-at-a-reasonable-price (QARP)
Indicative number of holdings	15 to 25
Suggested minimum investment timeframe	3 to 5 years
Investment return objective	To deliver strong returns above benchmark, over the medium to long term, by investing in a concentrated portfolio of large-cap Australian listed companies.
Who should invest	The Lonsec Australian Equity Core Model Portfolio is suitable for investors seeking capital growth, and a good dividend yield, over a holding period of at least three years.
Description	<p>In constructing all equity model portfolios, Lonsec fundamentally believes that good active management is about adding value to the benchmark return (alpha) whilst also reducing portfolio risk (portfolio beta). Lonsec believes value can be added by constructing concentrated portfolios of quality stocks with low turnover. Risk can be lowered by implementing firm portfolio construction rules, selecting quality stocks (from attractive sectors) that are trading at a reasonable price and by closely monitoring a number of portfolio risk metrics.</p> <p>Lonsec's equity model portfolio style is best described as a combination of:</p> <ul style="list-style-type: none"> • high conviction – portfolios are typically concentrated at around 15 stocks • quality at a reasonable price – they are looking for more than growth at a reasonable price, Lonsec assess a number of company and industry metrics to find quality stocks trading at a reasonable price and within preferred GICS sectors, and • low turnover – once they find the best companies in the best industries, Lonsec tend to hold for 3 to 5 years. This means the annual turnover is around 20 to 30% pa. They firmly believe that low turnover plays an important role in adding value and reducing risk.
Indicative asset allocation	Australian equities: 90% to 98.5% Cash: 1.5% to 10%
Benchmark	S&P/ASX 200 Accumulation Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$25,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Lonsec Australian Equity Income

Code	SMALON02S
Investment Manager	Lonsec Investment Solutions Pty Ltd
Style	Quality-at-a-reasonable-price (QARP)
Indicative number of holdings	12 to 25
Suggested minimum investment timeframe	3 to 5 years
Investment return objective	To deliver an above-benchmark, tax-effective income stream and reasonable capital growth, over the medium to long term, by investing in a concentrated portfolio of large-cap Australian listed companies.
Who should invest	The Lonsec Australian Equity Income Model Portfolio is suitable for investors seeking an above benchmark, tax-advantaged income stream, and capital growth at least in-line with inflation, over a holding period of at least 3 years.
Description	<p>In constructing all equity model portfolios, Lonsec fundamentally believes that good active management is about adding value to the benchmark return (alpha) whilst also reducing portfolio risk (portfolio beta). Lonsec believes value can be added by constructing concentrated portfolios of quality stocks with low turnover. Risk can be lowered by implementing firm portfolio construction rules, selecting quality stocks (from attractive sectors) that are trading at a reasonable price and by closely monitoring a number of portfolio risk metrics.</p> <p>Lonsec's equity model portfolio style is best described as a combination of:</p> <ul style="list-style-type: none"> • high conviction – portfolios are typically concentrated at around 15 stocks • quality at a reasonable price – they are looking for more than growth at a reasonable price, Lonsec assess a number of company and industry metrics to find quality stocks trading at a reasonable price and within preferred GICS sectors, and • low turnover – once they find the best companies in the best industries, Lonsec tend to hold for 3 to 5 years. This means the annual turnover is around 20 to 30% pa. They firmly believe that low turnover plays an important role in adding value and reducing risk.

Code	SMAPPM01S
Investment Manager	Macquarie Investment Management Global Limited
Style	Style neutral (ie no specific style bias)
Indicative number of holdings	10 to 50
Suggested minimum investment timeframe	5+ years
Investment return objective	To outperform the S&P/ASX 200 Accumulation Index before fees and costs over a rolling five-year period.
Who should invest	Clients seeking broad share market exposure, and looking for the opportunity to outperform during all market cycles in a consistent, risk adjusted fashion.
Description	The Macquarie Core Australian Equity Model Portfolio provides exposure to a portfolio of Australian equities through securities listed, or expected to be listed, on the Australian Securities Exchange. The Investment Manager aims to build a portfolio of equities that are exposed to a wide range of factors driving share market performance. This may result in the portfolio holding both 'value' and 'growth' equities.
Indicative asset allocation	Australian equities: 95% to 98.5% Cash: 1.5% to 5%
Benchmark	S&P/ASX 200 Accumulation Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

5. How we invest your money

Macquarie Diversified Fixed Income

Code	SMAPPM11S	
Investment Manager	Macquarie Investment Management Global Limited	
Style	Style neutral (ie no specific style bias)	
Indicative number of holdings	3 Managed Funds	
Suggested minimum investment timeframe	3+ years	
Investment return objective	To provide investors with capital growth and some income over the medium term by using an active investment strategy through investments in a diversified portfolio of global and domestic fixed income securities.	
Who should invest	Clients seeking an investment which provides exposure to a diverse portfolio of global and domestic fixed income securities with the aim of outperforming the Bloomberg Ausbond Bank Bill index over the medium to long term (before fees).	
Description	The Macquarie Diversified Fixed Income Model Portfolio provides investors with exposure to a large number of diverse fixed income securities across the spectrum of global and domestic markets. The portfolio consists of a blend of actively managed funds. Blending these managed funds provides a defensive fixed income offering aligned to the Macquarie Asset Management Public Investments philosophy which is based on the management of the downside, considering capital preservation to be paramount. This encompasses both management of interest rate exposures as well as credit allocations. There is also a strong respect for liquidity, a risk often overlooked, as the investment manager's proprietary research has identified that liquidity risk is in fact the biggest risk in managing a defensive multi-strategy portfolio.	
Indicative asset allocation	Fixed income:	95% to 99%
	Cash:	1% to 5%
Benchmark	Bloomberg AusBond Bank Bill Index	
Risk level	Medium to High	
Standard Risk Measure	5	
Minimum Portfolio Size	\$25,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.	

Macquarie Evolve Balanced Multi-Asset

Code	SMAMAQ05S	
Investment Manager	Macquarie Investment Management Global Limited	
Style	Style agnostic	
Indicative number of holdings	5 to 15 Managed Funds	
Suggested minimum investment timeframe	3+ years	
Investment return objective	Aims to provide positive returns of 4.5% per annum above Australian inflation (before fees) over the medium term. Inflation is defined as the Consumer Price Index (CPI) as measured by the Reserve Bank of Australia Trimmed Mean, as published by the Australian Bureau of Statistics.	
Who should invest	The Macquarie Evolve Balanced Multi-Asset Model Portfolio is designed for fee conscious investors with some tolerance for volatile returns in the short term who seek higher medium-term returns generated through a dynamic multi-asset strategy with a balanced exposure to growth and defensive assets.	
Description	<p>The Macquarie Evolve Balanced Multi-Asset Model Portfolio takes an alternative and dynamic approach to multi-asset investing with broad diversified exposure to asset classes such as fixed income, equities, listed property, listed infrastructure and alternatives.</p> <p>This SMA Model Portfolio has exposure to a diversified holding of managed funds consisting of a range of actively managed funds complemented by a satellite allocation to strategies that seek to deliver benchmark returns. The strategy's flexible and dynamic approach seeks to capture a wide spectrum of opportunities while limiting risk.</p>	
Indicative asset allocation	Real return core:	20 to 75%
	Australian equities:	0% to 50%
	International equities:	0% to 50%
	Australian fixed interest:	0% to 50%
	International fixed interest:	0% to 50%
	Global real estate:	0% to 15%
	Global infrastructure:	0% to 15%
	Cash:	1% to 50%
Benchmark	Benchmark unaware	
Risk level	Medium to High	
Standard Risk Measure	5	
Minimum Portfolio Size	\$5,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Macquarie Evolve Income Multi-Asset

Code	SMAMAQ10S
Investment Manager	Macquarie Investment Management Global Limited
Style	Style agnostic
Indicative number of holdings	25 to 35
Suggested minimum investment timeframe	3+ years
Investment return objective	Aims to provide attractive levels of regular income, including franked dividends, targeting a grossed-up yield of RBA cash rate plus 4% to 5% per annum (before fees). The investment objective is not a forecast or guarantee of income return. There is no guarantee that the SMA Model Portfolio will achieve its performance objectives or produce returns that are positive. This investment target is based on estimates and projections about the market into which the SMA Model Portfolio will invest, based on the beliefs and assumptions of the Investment Manager. The income yield may be higher or lower due to a range of factors including but not limited to market volatility, interest rate movements, corporate earnings, perceptions of credit quality, market sentiment, issuer default, and investor's eligibility for franking. The total return of the SMA Model Portfolio may be less than the income return of the SMA Model Portfolio.
Who should invest	The Macquarie Evolve Income Multi-Asset Model Portfolio is designed for investors, seeking income, with the ability to tolerate a moderate level of risk.
Description	<p>The Macquarie Evolve Income Multi-Asset Model Portfolio seeks to provide attractive levels of regular income (including franking credit maximisation) as well as some capital growth, whilst maintaining a strong focus on risk management.</p> <p>The Macquarie Evolve Income Multi-Asset Model Portfolio invests into actively managed real return solution designed to deliver consistent monthly distributions by investing across various asset classes with dynamic asset allocation seeking to smooth the overall return profile as well as direct Australian equities, targeting a strong and consistent gross-dividend yield and additional franking credit maximisation.</p>
Indicative asset allocation	Real return core: 40% to 70% Direct Australian equities: 30% to 60% Cash: 1% to 10%
Benchmark	RBA cash rate
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$100,000. Refer to section 5.4 for more information on Minimum Portfolio Size.

5. How we invest your money

Macquarie Growth ex-20 Australian Equity

Code	SMAPPM08S
Investment Manager	Macquarie Investment Management Global Limited
Style	Style neutral (ie no specific style bias)
Indicative number of holdings	10 to 50
Suggested minimum investment timeframe	5+ years
Investment return objective	To outperform the S&P/ASX 300 Accumulation Index, excluding the return contribution made by constituents of the S&P/ASX20 Leaders Accumulation Index, (before fees and costs) over a rolling five-year period.
Who should invest	Investors seeking a quality Australian equities portfolio, who are focused on long-term capital appreciation.
Description	The Macquarie Growth ex-20 Australian Equity Model Portfolio provides exposure to a concentrated portfolio of Australian equities through securities listed, or expected to be listed, on the Australian Securities Exchange excluding the ASX20. Only those securities that we have the highest conviction to generate the greatest returns will be included in the portfolio. The portfolio aims to invest in companies that grow earnings faster than the market.
Indicative asset allocation	Australian equities: 95% to 98.5% Cash: 1.5% to 5%
Benchmark	S&P/ASX 300 Accumulation Index excluding the S&P/ASX20 Leaders Accumulation Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$25,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Macquarie Income Australian Equity

Code	SMAPPM02S
Investment Manager	Macquarie Investment Management Global Limited
Style	Style neutral (ie no specific style bias)
Indicative number of holdings	10 to 50
Suggested minimum investment timeframe	5+ years
Investment return objective	To outperform the S&P/ASX200 Industrials Accumulation Index over the economic cycle and to provide above market levels of tax-effective income (via franked dividends), with lower volatility than the broader Australian share market.
Who should invest	The Macquarie Income Australian Equity Model Portfolio is designed for investors seeking tax-efficient income from a lower risk exposure to the Australian share market.
Description	<p>The Macquarie Income Australian Equity Model Portfolio favours cash generative companies, or those with access to capital at reasonable rates, that are able to pay above average dividends to shareholders as well as reinvesting for future growth.</p> <p>This SMA Model Portfolio is benchmarked to the S&P/ASX200 Industrials Accumulation Index. Energy and resources companies are not included in the Model Portfolio as volatile commodity prices do not lend themselves to strong, sustainable dividends.</p>
Indicative asset allocation	Australian equities: 95% to 98.5% Cash: 1.5% to 5%
Benchmark	S&P/ASX200 Industrials Accumulation Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

5. How we invest your money

Macquarie Professional Series Global Equity

Code	SMAMAQ13S
Investment Manager	Macquarie Investment Management Global Limited
Style	Neutral
Indicative number of holdings	3 to 5 Managed Funds
Suggested minimum investment timeframe	7+ years
Investment return objective	Aims to achieve a long-term total return (before fees and costs), that exceeds the MSCI World ex-Australia Index in \$A unhedged with net dividends reinvested.
Who should invest	<p>The Macquarie Professional Series Global Equity Portfolio is designed for consumers who:</p> <ul style="list-style-type: none"> • are seeking capital growth • are intending to use the Fund as a satellite within a portfolio • have a medium to long-term investment timeframe • have a high or very high risk/return profile, and • require the ability to have daily access to capital. <p>In certain limited circumstances, the Fund is designed for consumers who:</p> <ul style="list-style-type: none"> • are seeking income distribution • are intending to use the Fund as a core component within a portfolio, and • have a medium risk/return profile.
Description	The Macquarie Professional Series Global Equity Portfolio provides exposure to a diversified portfolio of global equities, which may include securities listed in emerging markets as well as securities of small capitalisation companies, by investing in funds forming part of the Macquarie Professional Series (each an Underlying Fund). The Underlying Funds are managed by specialist investment managers with complementary investment approaches (Underlying Managers) to suit, in the Investment Manager's opinion, different market conditions.
Indicative asset allocation	<p>International equities: 95% to 99%</p> <p>Cash: 1% to 5%</p>
Benchmark	MSCI World ex-Australia Index in \$A unhedged with net dividends reinvested
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$100,000. Refer to section 5.4 for more information on Minimum Portfolio Size.

Martin Currie Equity Income

Code	SMALEG02S
Investment Manager	Martin Currie Australia
Style	Income
Indicative number of holdings	Around 35
Suggested minimum investment timeframe	3+ years
Investment return objective	<p>The Martin Currie Equity Income Model Portfolio aims to provide an annual franked income before fees in excess of the franked S&P/ASX 200 Accumulation Index yield that grows faster than inflation and with less risk than S&P/ASX200 Accumulation Index in the long term.</p> <p>The investment strategy is not managed against a benchmark but may be compared to the S&P/ASX 200 Accumulation Index over the long term.</p>
Who should invest	The Martin Currie Equity Income Model Portfolio is suitable for an investor seeking a growing income stream from an investment in Australian shares. This SMA Model Portfolio is well suited to blending with other income and growth assets as part of a diversified portfolio.
Description	The Martin Currie Equity Income Model Portfolio aims to deliver a growing income stream that can exceed inflation. This SMA Model Portfolio invests in Australian companies that are considered to have high quality business models and solid dividend paying prospects through the business cycle and with lower risk than the broader equity market. Stocks are selected based on four investment criteria: valuation, quality, direction and ability to sustain dividends, from both a fundamental and quantitative perspective. Martin Currie Australia believes that the combination of these four investment factors, combined with diversification at the stock and sector level, can lead to strong income and capital returns over the long term.
Indicative asset allocation	Australian equities: 90% to 98.5% Cash: 1.5% to 10%
Benchmark	Benchmark unaware
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

McQueen Balanced

Code	SMADRC01S	
Investment Manager	Drummond Capital Partners Pty Ltd	
Style	Active	
Indicative number of holdings	8 to 40	
Suggested minimum investment timeframe	5+ years	
Investment return objective	To deliver a return in line with the benchmark, after fees, over a rolling five year period with lower than benchmark drawdown.	
Who should invest	Investors who seek a diversified portfolio with some potential for capital growth and regular income. They are prepared to accept a high level of risk to achieve this objective	
Description	The portfolio is an actively managed diversified mix of defensive assets (such as cash and fixed interest) and growth assets (such as Australian and international shares, listed property and infrastructure). In general, the portfolio's long term average exposure will be around 50% defensive assets and around 50% in growth assets. However, the tactical asset allocation overlay adopted by Drummond allows for the deviation in long term average within +/- 10%.	
Indicative asset allocation	<div> <div>Australian equities:</div> <div>5% to 30%</div> </div> <div> <div>International equities:</div> <div>5% to 50%</div> </div> <div> <div>Australian fixed interest:</div> <div>0% to 50%</div> </div> <div> <div>International fixed interest:</div> <div>0% to 50%</div> </div> <div> <div>Property:</div> <div>0%to 40%</div> </div> <div> <div>Alternative investments:</div> <div>0% to 40%</div> </div> <div> <div>Cash:</div> <div>2% to 60%</div> </div>

McQueen Dynamic

Code	SMADRC13S																
Investment Manager	Drummond Capital Partners Pty Ltd																
Style	Multi-asset																
Indicative number of holdings	8 to 40																
Suggested minimum investment timeframe	5+ years																
Investment return objective	To deliver an investment return in line with the benchmark, after fees, over a rolling five-year																
Who should invest	Seek return above inflation with some capital growth by investing in a diversified portfolio. They are prepared to accept a high level of risk to achieve this objective..																
Description	<p>The portfolio is a goals based portfolio that tactically adjusts the level of risk taken (via growth assets such as Australian and international shares, listed property infrastructure) in order to achieve its targeted return. The portfolio has a dual objective of the target return, whilst maintaining a strong focus on downside risk management. To achieve this dual objective, the portfolio has a flexible asset allocation strategy. This enables Drummond to take advantage of opportunities as they arise, participating in the long-term asset growth when times are good and conversely protecting capital by moving to defensive assets (such as cash and fixed interest) during negative periods.</p> <p>In general, the portfolio's long term average exposure will be around 50% defensive assets and around 50% in growth assets. However, the portfolio's strategy is relatively unconstrained and actual asset allocation can deviate from the long-term average position within +/- 40%.</p>

Investment return objective	To deliver a return in line with the benchmark, after fees, over a rolling nine year period with lower than benchmark drawdown.
Who should invest	Investors who seek a diversified portfolio with the potential to deliver a high total return, mainly from long term capital growth. They are prepared to accept a very high level of risk to achieve this objective.
Description	The portfolio is an actively managed diversified mix of growth assets such as Australian and international shares, alternatives, listed property and infrastructure.
Indicative asset allocation	Australian equities: 10% to 50% International equities: 10% to 80% Australian fixed interest: 0% to 5% Property: 0% to 50% Alternative investments: 0% to 50% Cash: 2% to 5%
Benchmark	Morningstar Peer Group Multisector Aggressive Peer Index
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$25,000

5. How we invest your money

MFM Defensive

Code	SMAACT05S	
Investment Manager	Activam Group Pty Ltd	
Style	Defensive	
Indicative number of holdings	10 to 15	
Suggested minimum investment timeframe	3 years	
Investment return objective	This portfolio aims to deliver a rate of return that exceeds inflation (consumer price index) by at least 1% per annum over a rolling 3-year period	
Who should invest	This portfolio suits investors who want to preserve their capital and are very conservative. They have low to moderate risk tolerances and are looking for a way to earn a steady income.	
Description	The MFM defensive portfolio is an actively managed diversified portfolio of funds across growth asset classes (e.g. Australian equities, international equities, property, infrastructure) and defensive asset classes (e.g., fixed interest, cash). This portfolio will have an average long-term exposure of approximately 15% growth assets and 85% defensive assets; however, the actual asset class allocations will be determined by Activam's views on the macroeconomic and earnings environment, market conditions and cycles, and actively managed within the allowable ranges.	
Indicative asset allocation	Australian fixed interest:	10% to 40%
	International fixed interest:	10% to 40%
	Alternative investments:	14% to 26%
	Cash:	1% to 19.5%
Benchmark	Benchmark unaware	
Risk level	Medium to High	
Standard Risk Measure	4	
Minimum Portfolio Size	\$25,000 Refer to section 5.4 for more information on Minimum Portfolio Size.	

MFM High Growth

Code	SMAACT06S
Investment Manager	Activam Group Pty Ltd
Style	Aggressive
Indicative number of holdings	15 to 20
Suggested minimum investment timeframe	10+ years
Investment return objective	This portfolio aims to deliver a rate of return that exceeds inflation (consumer price index) by at least 4% per annum over a rolling 10-year period.
Who should invest	This portfolio suits investors who have high tolerance for investment volatility in return for above average investment performance. Therefore, this portfolio is suitable for investors with long-term investment time frame.
Description	The MFM High Growth portfolio is an actively managed diversified portfolio of funds across growth asset classes (e.g. Australian equities, international equities, property, infrastructure) and defensive asset classes (e.g., fixed interest, cash). This portfolio will have an average long-term exposure of approximately 100% growth assets and 0% defensive assets; however, the actual asset class allocations will be determined by Activam's views on the macroeconomic and earnings environment, market conditions and cycles, and actively managed within the allowable ranges.

Morningstar Australian Shares Income

Code	SMAIBB02S
Investment Manager	Morningstar Investment Management Australia Limited
Style	Equity income
Indicative number of holdings	15 to 30
Suggested minimum investment timeframe	7 years
Investment return objective	To provide investors with greater risk-adjusted returns and a higher sustainable franked dividend yield relative to the S&P/ASX 200 Accumulation Index in the long term.
Who should invest	The Morningstar Australian Shares Income Model Portfolio is suitable for investors who seek a reliable, above-market average income yield with moderate long term capital growth relative to that of the performance benchmark.
Description	The Morningstar Australian Shares Income Model Portfolio is an actively managed and concentrated portfolio consisting of ASX-listed stocks covered by Morningstar's large Equity Research team. Morningstar focuses portfolio exposure on companies with competitive advantages, a market price offering margin of safety, a sustainable dividend yield above the benchmark, and franking credits. This combination of factors helps to preserve capital and reduce volatility in various market environments. Portfolio turnover is modest to minimise costs and further support after-tax performance. Morningstar Equity Research analysts' ratings, such as Fair Value Estimate, Economic Moat, and Valuation Uncertainty, are important inputs to the portfolio construction process. Total return will tend to be driven more by income than capital appreciation, though both are desirable.
Indicative asset allocation	Australian shares: 90% to 98.5% Cash: 1.5% to 10%
Benchmark	S&P/ASX 200 Accumulation Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Morningstar Australian Shares Income – Series 2

Code	SMAIBB11S
Investment Manager	Morningstar Investment Management Australia Limited
Style	Equity income
Indicative number of holdings	15 to 30
Suggested minimum investment timeframe	7 years
Investment return objective	The portfolio aims to provide investors with greater higher risk-adjusted returns after fees, and a higher sustainable net and gross franked dividend yield relative to the benchmark S&P/ASX 200 Accumulation Index over a complete cycle.
Who should invest	The Morningstar Australian Shares Income – Series 2 Model Portfolio is suitable for investors who seek long-term income returns better than the share market overall.
Description	<p>The Morningstar Australian Shares Income – Series 2 Model Portfolio aims to provide investors with higher risk-adjusted returns after fees, and a sustainable franked dividend relative to the benchmark S&P/ASX 200 Accumulation Index over a complete cycle. The portfolio is actively managed and concentrated, predominantly consisting of S&P/ASX 200 Index constituents that may be covered by Morningstar Investment Management (MIM) with supporting research from Morningstar Equity Research (MER). Portfolio exposure is focused on companies with competitive advantages, a market price offering margin of safety, and sustainable cash flow generation supporting sustainable, franked dividend payouts. This combination of factors helps to preserve capital and reduce volatility in various market environments.</p> <p>Portfolio turnover is expected to be modest to minimise costs and further enhance after-tax performance. MIM's proprietary in-house valuation methodologies and MER are important inputs to the portfolio construction process.</p>
Indicative asset allocation	Australian shares: 90% to 98.5% Cash: 1.5% to 10%
Benchmark	S&P/ASX 200 Accumulation Index
Risk level	Very High
Standard Risk Measure	7
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Morningstar Balanced Growth

Code	SMAIBB17S	
Investment Manager	Morningstar Investment Management Australia Limited	
Style	An actively managed diversified portfolio of securities across both growth asset classes and income oriented asset classes.	
Indicative number of holdings	25 to 60	
Suggested minimum investment timeframe	6+ years	
Investment return objective	To achieve capital growth along with some income, by investing in a diversified portfolio of growth and defensive assets, with a tilt towards growth assets.	
Who should invest	The Morningstar Balanced Growth Model Portfolio is designed for investors who wish to achieve diversification across multiple asset classes, investment strategies and styles. They are prepared to accept a medium to high risk of capital loss in the short term and are willing to compound their investment for at least six years to achieve this objective.	
Description	The Morningstar Balanced Growth Model Portfolio is an actively managed diversified portfolio of securities across both growth asset classes such as Australian equities, property and global securities, and income oriented asset classes, such as cash and fixed interest securities. In general, the portfolio's long term average exposure will be around 60% growth assets and around 40% income assets, however the allocations will be actively managed within the allowable ranges depending on market conditions.	
Indicative asset allocation	<div> <div>Australian shares:</div> <div>0% to 55%</div> </div> <div> <div>International shares:</div> <div>0% to 55%</div> </div> <div> <div>Global property and infrastructure:</div> <div>0% to 40%</div> </div> <div> <div>Alternative investments:</div> <div>0% to 25%</div> </div> <div> <div>Australian bonds:</div> <div>0% to 35%</div> </div> <div> <div>Global bonds:</div> <div>0% to 35%</div> </div> <div> <div>Cash:</div> <div>1.5% to 50%</div> </div>	
Benchmark	Benchmark unaware	
Risk level	Medium to High	
Standard Risk Measure	5	
Minimum Portfolio Size	\$100,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.	

Morningstar Conservative

Code	SMAIBB09S	
Investment Manager	Morningstar Investment Management Australia Limited	
Style	An actively managed diversified portfolio of securities across both growth asset classes and income oriented asset classes.	
Indicative number of holdings	15 to 60	
Suggested minimum investment timeframe	2 years	
Investment return objective	To achieve a consistent income return by investing in a diversified portfolio of predominantly defensive asset classes, with a small proportion of growth assets.	
Who should invest	The Morningstar Conservative Model Portfolio is designed for investors whose main objective is stability of income and capital. A lower risk of capital loss can be expected, but overall returns are also likely to be lower.	
Description	The Morningstar Conservative Model Portfolio is an actively managed diversified portfolio of securities across both income oriented asset classes, such as cash and fixed interest securities, and growth asset classes such as Australian equities, property and global securities. In general, the portfolio's long term average exposure will be around 85% income assets and around 15% growth assets, however the allocations will be actively managed within the allowable asset allocation ranges depending on market conditions.

Morningstar Medalist Core High Growth

Code	SMAIBB32S		
Investment Manager	Morningstar Investment Management Australia Limited		
Style	Active		
Indicative number of holdings	8 to 25		
Suggested minimum investment timeframe	9 years		
Investment return objective	To deliver outperformance of the asset weighted benchmark over rolling 9-year periods.		
Who should invest	Designed for investors whose main objective is to accumulate assets by targeting capital growth over the long term. They are prepared to accept a high risk of capital loss to achieve this objective.		
Description	<p>The Portfolio has exposure to a diverse mix of managed fund investments, which include primarily growth assets and may have some exposure to interest-producing assets. Over the long term, the Portfolio aims to have a 10% allocation to defensive assets and a 90% allocation to growth assets.</p> <p>The portfolios are constructed using managers that achieved a medalist rating and will seek to optimise the exposure to active and passive management, only using active management where the probability of the medalist universe achieving a reasonable excess return for the asset class is greater than the probability of underperformance</p> <p>Capital volatility is expected due to a high exposure to growth asset classes.</p> <p>The Portfolio is constructed around an asset allocation based on the strategy’s long-term objectives. The Portfolio and asset allocation are reviewed to adapt to changes in market conditions. The asset allocation, selection and blending of managed funds are actively managed with a strong focus on risk.</p> <p>Fund managers, their funds and the construction of the Portfolio are regularly reviewed for suitability and market conditions.</p>		
Indicative asset allocation	Australian equities:	24% to 44%	
	International equities:	31% to 51%	
	Australian fixed interest:	0% to 14%

Partners Wealth Group Balanced

Code	SMA PWG02S		
Investment Manager	Partners Wealth Group Pty Ltd		
Style	Style neutral		
Indicative number of holdings	30 to 45		
Suggested minimum investment timeframe	4+ years		
Investment return objective	To provide a return of 3% above the Bloomberg AusBond Bank Bill Index over the medium to long term.		
Who should invest	The Partners Wealth Group Balanced Model Portfolio is suitable for investors who seek to grow their capital over time and can tolerate some volatility of capital and returns.		
Description	<p>The Partners Wealth Group Balanced Model Portfolio invests in a diversified mix of growth and defensive assets with a bias towards growth assets. The portfolio aims to provide a return of 3% above the Bloomberg AusBond Bank Bill rate over the medium to long term.</p> <p>A traditional multi-asset investment approach is applied in the management of this SMA Model Portfolio. Tactical asset allocation is actively employed with the objective of smoothing portfolio volatility and enhancing long-term returns. Complementing the tactical asset allocation approach, the underlying asset class portfolios are actively managed with the aim of generating returns in excess of the corresponding benchmark indices.</p> <p>The Partners Wealth Group Balanced Model Portfolio prioritises capital preservation and manages risk primarily through diversification across a broad array of assets and securities.</p>		
Indicative asset allocation	Australian equities:	15% to 45%	
	International equities:	0% to 40%	
	Australian fixed income:	0% to 27%

Partners Wealth Group Diversified Fixed Income

Code	SMAPWG03S	
Investment Manager	Partners Wealth Group Pty Ltd	
Style	Neutral	
Indicative number of holdings	5 to 15	
Suggested minimum investment timeframe	3+ years	
Investment return objective	To outperform the Bloomberg AusBond Bank Bill Index + 1% pa over the medium term.	
Who should invest	The Partners Wealth Group Diversified Fixed Income Model Portfolio is suitable for investors who seek exposure to a diversified fixed income portfolio with low to moderate volatility.	
Description	<p>The Partners Wealth Group Diversified Fixed Income Model Portfolio uses a combination of direct listed fixed income securities and managed funds. The portfolio provides diversified fixed income exposure with an objective of outperforming the Bloomberg AusBond Bank Bill Index.</p> <p>This SMA Model Portfolio will provide exposure to an actively managed portfolio of international and domestic fixed interest securities. The portfolio invests in both direct listed fixed income securities such as capital notes, and investment vehicles such as Managed Funds.</p> <p>The Partners Wealth Group Investment Committee undergoes a rigorous process of evaluating investments, using both proprietary internal research and external research to identify suitable investments. Suitable investments are then evaluated relative to the portfolio exposures to ensure diversification of various sectors such as investment grade, credit and geographical exposures.</p>	
Indicative asset allocation	Australian fixed income: 0% to 97% International fixed income: 0% to 97% Hybrid: 0% to 50% Cash: 3% to 25%	
Benchmark	Bloomberg AusBond Bank Bill Index + 1%

Investment Manager	Partners Wealth Group Pty Ltd		
Style	Neutral		
Indicative number of holdings	20 to 45		
Suggested minimum investment timeframe	4+ years		
Investment return objective	To provide a return of 4.5% above the AusBond Bank Bill Index over the long term.		
Who should invest	The Partners Wealth Group High Growth Model Portfolio is suitable for investors who seek to grow their capital over time and can tolerate some volatility of capital and returns.		
Description	<p>The Partners Wealth Group High Growth Model Portfolio invests in a diversified mix of assets. The portfolio has a bias towards growth assets with a long term target of 97% in growth.</p> <p>This SMA Model Portfolio aims to provide a return above a blend of 45% S&P/ASX 200 Accumulation Index, 40% MSCI World Net Return (AUD) Index and 15% S&P/ASX 200 A-REIT Accumulation Index.</p> <p>A traditional multi-asset investment approach is applied in the management of this SMA Model Portfolio. Tactical asset allocation is actively employed with the objective of smoothing portfolio volatility and enhancing long-term returns. Complementing the tactical asset allocation approach, the underlying asset class portfolios are actively managed with the aim of generating returns in excess of the corresponding benchmark indices.</p> <p>The Partners Wealth Group High Growth Model Portfolio prioritises capital preservation and manages risk primarily through diversification across a broad array of assets and securities.</p>

Partners Wealth Group International Equity

Code	SMAPWG04S				
Investment Manager	Partners Wealth Group Pty Ltd				
Style	Neutral				
Indicative number of holdings	5 to 15				
Suggested minimum investment timeframe	7+ years				
Investment return objective	To outperform the MSCI World Net Return (AUD) Index over the medium to long term.				
Who should invest	The Partners Wealth Group International Equity Model Portfolio is suitable for investors who seek exposure to international equity to grow their capital over time and can tolerate high volatility of capital and returns.				
Description	<p>The Partners Wealth Group International Equity Model Portfolio is a portfolio that aims to invest in approximately 5 to 15 managed fund holdings. The objective of the portfolio is to outperform the MSCI World Net Return (AUD) Index over the long-term. The portfolio is built using a style-agnostic approach, with the aim of providing outperformance while reducing volatility over the medium to long term.</p> <p>This SMA Model Portfolio primarily holds international equity based Exchange Traded Funds and Managed Funds but has the ability to invest in international equity based Listed Investment Companies and other investment vehicles. Holdings can be hedged or unhedged.</p> <p>The Partners Wealth Group Investment Committee undergoes a rigorous process of evaluating fund managers, using both proprietary internal research and external research to identify suitable funds. Suitable funds are then evaluated relative to the portfolio exposures to ensure diversification of various styles such as 'growth', 'value', market capitalisation exposures and geographical exposures.</p>

Pendal Australian Shares

Code	SMAPEN01S
Investment Manager	Pendal Institutional Limited
Style	Growth
Indicative number of holdings	15 to 35
Suggested minimum investment timeframe	5+ years
Investment return objective	To deliver outperformance relative to the benchmark over a rolling three year period with a primary focus on capital growth.
Who should invest	The Pendal Australian Shares Model Portfolio is designed for investors who seek a broad based, active Australian share portfolio utilising a fundamental company research approach where outperformance is driven primarily by share selection.
Description	The Pendal Australian Shares Model Portfolio seeks to deliver long-term returns by investing in companies listed on the ASX to create a diversified portfolio of broad-cap Australian shares. The stock selection process applies an active, bottom-up approach to analysing companies. Pendal's fundamental company research focuses on valuation, risk factors (financial and non-financial), franchise and management quality. In selecting stocks, Pendal are looking for specific factors which can trigger a change in a company's earnings, or in the quality of those earnings.
Indicative asset allocation	Australian shares: 90% to 99% Cash: 1% to 10%
Benchmark	S&P/ASX 300 Accumulation Index
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Pendal Sustainable Balanced

Code	SMAPEN03S		
Investment Manager	Pendal Institutional Limited		
Style	Active with selected use of passive		
Indicative number of holdings	5 to 20		
Suggested minimum investment timeframe	5+ years		
Investment return objective	To provide a return (before fees and expenses) that exceeds the portfolio's benchmark over the medium to long term through a diversified portfolio. The portfolio has a higher weighting towards growth assets than defensive assets.		
Who should invest	The Pendal Sustainable Balanced Model Portfolio suits investors who are looking for a single implemented sustainable solution.		
Description	The Pendal Sustainable Balanced Model Portfolio is a diversified portfolio that actively invests considering a range of sustainable, ethical and financial criteria. Investments are diversified across Australian and international shares, Australian and international property securities, Australian and international fixed interest, cash and alternative investments. Sustainable and ethical investment practices are incorporated into the Australian and international shares, Australian and international fixed interest and the alternative investments components. Pendal actively seeks exposure to securities and industries that demonstrate leading environmental, social and corporate governance (ESG) and ethical practices while avoiding exposure to companies with activities or behaviour we consider to negatively impact the environment or society. ESG considerations are also taken into account at the asset allocation level.		
Indicative asset allocation	Australian equities:	9% to 39%	
	International equities:	18% to 48%	
	Australian fixed interest:	0% to 29%

Prime Australian Equities Growth Portfolio

Code	SMAPRM02S	
Investment Manager	Primestock Securities Limited	
Style	Growth-at-a-reasonable-price (GARP)	
Indicative number of holdings	10 to 25	
Suggested minimum investment timeframe	5+ years	
Investment return objective	To achieve capital growth with moderate tax-effective income via franked dividends through investment in listed Australian securities.	
Who should invest	The Prime Australian Equities Growth Model Portfolio is suited to investors who have an investment time horizon of at least 5 years. It is suitable for clients seeking to generate capital growth with moderate tax-effective income via franked dividends through investment in listed Australian securities.	
Description	<p>The Prime Australian Equities Growth Model Portfolio is managed in line with Prime's investment principle of long-term investment in high quality securities. The bottom up approach focuses on business fundamentals, seeking businesses with strong balance sheets, structural competitive advantages, and purchasing them with the requisite dividend yield and growth prospects.</p> <p>The top down overlay, which considers the macroeconomic environment and stage in the economic cycle, assists individual stock selection and portfolio construction. In depth research provides the insight to make high conviction investments. Sector concentration risks are assessed to measure and manage diversification across sectors, but sector weightings are unlikely to be close to the index.</p> <p>Diversification is used to reduce risk, having regard for target weights to GICS Industry Groups relative to the benchmark, allocations to different business risk levels and other factors. Formal portfolio review is on a monthly basis. Transactions will be carried out through each month as appropriate.</p>	
Indicative asset allocation	Australian equities:	85% to 98.5%
	Cash:	1.5% to 15%
Benchmark	S&P/ASX 200 Accumulation Index	
Risk level	Very High	
Standard Risk Measure	7	
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.	

5. How we invest your money

Prime Defensive Income Portfolio

Code	SMAPRM03S	
Investment Manager	Primestock Securities Limited	
Style	Style neutral (ie no specific style bias)	
Indicative number of holdings	5 to 20	
Suggested minimum investment timeframe	3+ years	
Investment return objective	The objective of the Prime Defensive Income Model Portfolio is to provide capital stability and to outperform the Bloomberg-Ausbond Bank Bill index on a rolling three year basis.	
Who should invest	The Prime Defensive Income Model Portfolio is suited to investors who have an investment time horizon of at least 3 years. It is suitable for clients seeking capital stability with a rate of return that exceeds the UBS Bloomberg AusBond Bank Bill Index over a 12 month period.	
Description	<p>The Prime Defensive Income Model Portfolio seeks to invest in fixed and variable income securities and cash, to provide a low-volatility, income stream that is above cash. The portfolio is diversified across fixed and variable income sources, and by geography, capital structure and issuer. The portfolio is reviewed formally each month.</p> <p>The investment strategy for the Prime Defensive Income Model Portfolio will take into consideration the inflation outlook, monetary policy and interest rates, economic and trading partner outlook, regulation, and currency exchange rates. These considerations will assist in determining the portfolio's structure and allocation to different instruments/ investments.</p>	
Indicative asset allocation	Fixed income:	30% to 98.5%
	Cash:	1.5% to 70%
Benchmark	Bloomberg AusBond Bank Bill Index	
Risk level	Medium to High	
Standard Risk Measure	5	
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.	

Prime Diversified Income Portfolio

Code	SMAPRM01S												
Investment Manager	Primestock Securities Limited												
Style	Income												
Indicative number of holdings	10 to 30												
Suggested minimum investment timeframe	5+ years												
Investment return objective	To generate a return that is 3% in excess of the RBA cash rate over rolling 5 year periods.												
Who should invest	The Prime Diversified Income Model Portfolio is suited to investors who have an investment time horizon of at least 5 years. It is suitable for clients looking for the capital value of their investment to at least keep pace with inflation and generate a solid level of income from dividends paid by a combination of Australian listed securities, listed and unlisted Australian property funds, and listed and unlisted Australian and global infrastructure funds.												
Description	<p>The Prime Diversified Income Model Portfolio is managed by selecting primarily those securities with moderate growth potential but robust income-generating capacity. These securities are expected to deliver an above-market average income yield, together with a relatively moderate level of capital growth.</p> <p>This SMA Model Portfolio is managed in line with Prime's investment principle of medium to long-term investment in high quality securities & managed funds.</p> <p>The top down overlay, which considers the macroeconomic environment and stage in the economic cycle, assists individual stock and fund selection and portfolio construction. In depth research provides the insight to make high conviction investments. Sector concentration risks are assessed to measure and manage diversification across sectors, but sector weightings are unlikely to be close to the index.</p> <p>Prime's macroeconomic view will shape portfolio construction insofar as asset class mix, alongside the relative value of each asset class to one another.</p> <p>Diversification is used to reduce risk, having regard for target weights to GICS Industry Groups relative to the benchmark, allocations to different business risk levels and other factors. Formal portfolio review is on a monthly basis. Transactions will be carried out through each month as appropriate.</p>

5. How we invest your money

Prime International Growth Portfolio

Code	SMAPRM04S		
Investment Manager	Primestock Securities Limited		
Style	Diversified		
Indicative number of holdings	3 to 10 managed funds		
Suggested minimum investment timeframe	5+ years		
Investment return objective	To outperform the MSCI World Index in AUD.		
Who should invest	The Prime International Growth Model Portfolio is suitable for investors seeking access to the diversity and growth offered by international equity markets.		
Description	The Prime International Growth Model Portfolio is designed to provide investors exposure to international equity markets by way of high-quality third-party fund managers.		
Indicative asset allocation	Fixed income:	85% to 98.5%	
	Cash:	1.5% to 15%	
Benchmark	MSCI World Index in AUD		
Risk level	Very High		
Standard Risk Measure	7		
Minimum Portfolio Size	\$25,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.		

PW Investments – Active Balanced

Code	SMAEVD02S
Investment Manager	Evidentia Group Pty Ltd
Style	Active Diversified
Indicative number of holdings	15 to 25
Suggested minimum investment timeframe	5 years
Investment return objective	The portfolio has a primary objective to exceed the return of the benchmark over a rolling 5-year period, after fees, and a secondary objective to preserve capital over this period.
Who should invest	This portfolio may suit investors with a minimum 5 year timeframe and are willing to accept higher levels of investment value volatility compared to more defensive options in return for higher potential investment performance. Some exposure to interest bearing assets is still desired, but the primary concern is a higher return, hence the exposure to 70% growth assets (shares, listed property, infrastructure and private equity).
Description	The portfolios are actively managed using a dynamic approach to asset allocation. The strategic asset allocation aims to have exposure to 70% growth assets and 30% defensive assets. Manager selection is then based on two distinct steps. Firstly, the efficiency of each asset class is assessed to determine whether active or passive investments are use. Secondly, managers are assessed on a quantitative and qualitative basis, selecting managers that are believed to best meet the investment objective.
Indicative asset allocation	<div> <div>Australian equities:</div> <div>15% to 45%</div> </div> <div> <div>International equities:</div> <div>20% to 50%</div> </div> <div> <div>Australian fixed interest:</div> <div>0% to 30%</div> </div> <div> <div>International fixed interest:</div> <div>0% to 30%</div> </div> <div> <div>Property</div> <div>0% to 20%</div> </div> <div> <div>Alternative investments:</div> <div>0% to 30%</div> </div> <div> <div>Cash:</div> <div>1% to 35%</div> </div>
Benchmark	Custom 70% Growth/Defensive Benchmark based on the Indicative Asset Allocation
Risk level	Balanced
Standard Risk Measure	5
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

5. How we invest your money

PW Investments – Active Growth

Code	SMAEVD03S
Investment Manager	Evidentia Group Pty Ltd
Style	Active Diversified
Indicative number of holdings	15 to 25
Suggested minimum investment timeframe	6 years
Investment return objective	The portfolio has a primary objective to exceed the return of the benchmark over a rolling 6-year period, after fees, and a secondary objective to preserve capital over this period.
Who should invest	This portfolio may suit investors with a minimum 6 year timeframe and are willing to accept higher levels of investment value volatility compared to more defensive options in return for higher potential investment performance. Some exposure to interest bearing assets is still desired, but the primary concern is a higher return, hence the exposure to 85% growth assets (shares, listed property, infrastructure and private equity).
Description	The portfolios are actively managed using a dynamic approach to asset allocation. The strategic asset allocation aims to have exposure to 85% growth assets and 15% defensive assets. Manager selection is then based on two distinct steps. Firstly, the efficiency of each asset class is assessed to determine whether active or passive investments are use. Secondly, managers are assessed on a quantitative and qualitative basis, selecting managers that are believed to best meet the investment objective.
Indicative asset allocation	<div> <div>Australian equities:</div> <div>25% to 55%</div> </div> <div> <div>International equities:</div> <div>25% to 55%</div> </div> <div> <div>Australian fixed interest:</div> <div>0% to 20%</div> </div> <div> <div>International fixed interest:</div> <div>0% to 20%</div> </div> <div> <div>Property</div> <div>0% to 20%</div> </div> <div> <div>Alternative investments:</div> <div>0% to 20%</div> </div> <div> <div>Cash:</div> <div>1% to 30%</div> </div>
Benchmark	Custom 85% Growth/Defensive Benchmark based on the Indicative Asset Allocation
Risk level	Growth
Standard Risk Measure	6
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

PW Investments – Active High Growth

Code	SMAEVD04S
Investment Manager	Evidentia Group Pty Ltd
Style	Active Diversified
Indicative number of holdings	15 to 25
Suggested minimum investment timeframe	7 years
Investment return objective	The portfolio has a primary objective to exceed the return of the benchmark over a rolling 7-year period, after fees, and a secondary objective to preserve capital over this period.
Who should invest	This portfolio may suit investors with a minimum 7 year timeframe and are willing to accept higher levels of investment value volatility compared to more defensive options in return for higher potential investment performance. The primary concern is generating a higher return, hence the exposure to 98% growth assets (shares, listed property, infrastructure and private equity).
Description	The portfolios are actively managed using a dynamic approach to asset allocation. The strategic asset allocation aims to have exposure to 98% growth assets and 2% defensive assets. Manager selection is then based on two distinct steps. Firstly, the efficiency of each asset class is assessed to determine whether active or passive investments are use. Secondly, managers are assessed on a quantitative and qualitative basis, selecting managers that are believed to best meet the investment objective.
Indicative asset allocation	<div> <div>Australian equities:</div> <div>30% to 60%</div> </div> <div> <div>International equities:</div> <div>30% to 60%</div> </div> <div> <div>Australian fixed interest:</div> <div>0% to 10%</div> </div> <div> <div>International fixed interest:</div> <div>0% to 10%</div> </div> <div> <div>Property</div> <div>0% to 20%</div> </div> <div> <div>Alternative investments:</div> <div>0% to 20%</div> </div> <div> <div>Cash:</div> <div>1% to 15%</div> </div>
Benchmark	Custom 98% Growth/Defensive Benchmark based on the Indicative Asset Allocation
Risk level	High Growth
Standard Risk Measure	7
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

RAM Australian Diversified Fixed Interest & Credit Securities

Code	SMARAM01S						
Investment Manager	Real Asset Management Pty Ltd						
Style	Style neutral						
Indicative number of holdings	10 to 25						
Suggested minimum investment timeframe	5+ years						
Investment return objective	<p>Primary objective To deliver a tax effective yield at a premium to cash with moderate levels of capital volatility.</p> <p>Secondary objective To outperform the benchmark by 1% including imputation credits, after fees and costs, over rolling three year periods, whilst generating returns in a tax effective manner.</p>						
Who should invest	The RAM Australian Diversified Fixed Interest & Credit Securities Model Portfolio is suitable for investors who are entitled to receive a rebate of imputation credits and seek tax effective income with moderate levels of capital volatility.						
Description	<p>The RAM Australian Diversified Fixed Interest & Credit Securities Model Portfolio is a directly held, actively managed income portfolio that aims to provide a regular yield at a premium to cash. The strategy blends floating rate securities and high quality fixed rate exposure to improve portfolio diversification and provide flight to safety benefits.</p> <p>The SMA Model Portfolio invests in a diversified portfolio of security types and structures to deliver on the investment objective and manage investment risks. RAM's belief is that via diversifying the portfolio and focusing on the higher quality end of the investment universe the strategy is best placed to exceed the performance objective through the economic cycle.</p> <p>A concentrated portfolio of listed credit securities (ranging from senior bonds and ETPs/ETFs/XTBs through to subordinated hybrid/capital note securities) is held with an aim of providing the portfolio with a tax efficient regular income stream at a premium to cash rates. Due to credit risk, limited liquidity and structural risks from the non-standard terms of issue in subordinated securities, RAM applies strict risk management processes to mitigate this.</p> <p>Active management, movements in credit spreads and interest rates are the key driver of strategy returns. Portfolio turnover is expected to be low reflecting RAM's long-term approach to portfolio construction.</p>						
Indicative asset allocation	<table> <tr> <td>Australian Fixed Interest:</td><td>15% to 75%</td></tr> <tr> <td>Hybrids:</td><td>25% to 85%</td></tr> <tr> <td>Cash:</td><td>1.5% to 50%</td></tr> </table>	Australian Fixed Interest:	15% to 75%	Hybrids:	25% to 85%	Cash:	1.5% to 50%

RAM Australian Listed Interest Rate Securities

Code	SMARAM02S						
Investment Manager	Real Asset Management Pty Limited						
Style	Style neutral						
Indicative number of holdings	15 to 30						
Suggested minimum investment timeframe	5+ years						
Investment return objective	<p>Primary objective To deliver a tax effective yield at a premium to cash with moderate to high levels of capital volatility.</p> <p>Secondary objective To outperform the benchmark by 2% including imputation credits, after fees and costs, over rolling three year periods, whilst generating returns in a tax effective manner.</p>						
Who should invest	The RAM Australian Listed Interest Rate Securities Model Portfolio is suitable for investors who are entitled to receive a rebate of imputation credits and seek tax effective income with moderate to high levels of capital volatility.						
Description	<p>The RAM Australian Listed Interest Rate Securities Model Portfolio is a directly held, actively managed income portfolio that aims to provide a regular yield at a premium to cash.</p> <p>The SMA Model Portfolio invests in a diversified portfolio of security types and structures to deliver on the investment objective and manage investment risks. RAM's belief is that via diversifying the portfolio and focusing on the higher quality end of the investment universe the strategy is best placed to exceed the performance objective through the economic cycle. The strategy is a floating rate income portfolio with a short duration investment style.</p> <p>A concentrated portfolio of listed credit securities (ranging from senior bonds and ETPs/ETFs/XTBs through to subordinated hybrid/capital note securities) is held with an aim of providing the portfolio with a tax efficient regular income stream, at a premium to cash rates. Due to credit risk, limited liquidity and structural risks from the non-standard terms of issue in subordinated securities, RAM applies strict risk management processes to mitigate this.</p> <p>Active management, movements in credit spreads and interest rates are the key driver of strategy returns. Portfolio turnover is expected to be low reflecting RAM's long-term approach to portfolio construction.</p>

SCM Assertive

Code	SMAEVE05S
Investment Manager	Evergreen Fund Managers Pty Ltd
Style	Growth
Indicative number of holdings	8 to 25
Suggested minimum investment timeframe	5 to 7 years
Investment return objective	To outperform the benchmark over rolling 7 year periods.
Who should invest	The SCM Assertive Model Portfolio is designed for investors seeking a growth portfolio that aims to provide long term capital growth from an emphasis on growth assets. Investors should be able to accept the risk of price fluctuations particularly over periods less than the minimum investment timeframe and be able to accept that capital preservation is not guaranteed.
Description	Evergreen uses a top-down, bottom-up approach to portfolio construction and manager selection. They develop and adopt proprietary asset allocation views and select managers using internal due diligence procedures to provide specific exposures. In general, the SCM Assertive Model Portfolio will be 90% exposed to growth assets. However, the allocations will be actively managed within the allowable ranges depending on market conditions.

SWU Dynamic Markets Growth

Code	SMAPFS02S										
Investment Manager	PFS Investment Management Pty Ltd										
Style	Multisector tactical growth										
Indicative number of holdings	10 to 20										
Suggested minimum investment timeframe	7 years										
Investment return objective	To provide returns in excess of CPI +4.5% pa over rolling 7 year periods.										
Who should invest	The SWU Dynamic Markets Growth Model Portfolio is suited to investors seeking growth with longer term time horizons who wish to allocate to an actively managed diversified portfolio of quality assets and strategies which are selected to achieve preservation of capital and commensurately rewarded risk exposures over the longer term.										
Description	<p>The SWU Dynamic Markets Growth Model Portfolio is a multi-asset and multi-strategy portfolio focused on longer term preservation of capital.</p> <p>This SMA Model Portfolio allocates capital to traditional asset classes when the risk is considered commensurate with the expected return. The strategy is implemented using a valuation driven pro-active asset allocation approach which recognises economic weight as opposed to market weight within the confines of the valuation parameters.</p>

Transcend High Conviction

Code	SMAMOR05S																
Investment Manager	Morrows Private Wealth Pty Ltd																
Style	High Growth																
Indicative number of holdings	5 to 12																
Suggested minimum investment timeframe	7+ years																
Investment return objective	To provide returns of CPI + 6% pa over a rolling 7-year period.																
Who should invest	The Transcend High Conviction Model Portfolio is suited to investors who are focused on achieving the stated return objective over the recommended time frame with some emphasis on managing portfolio risk, particularly during large market drawdowns. Investors should be prepared to accept a risk of capital loss to achieve the objective.																
Description	<p>The Transcend High Conviction Model Portfolio is a high growth portfolio that has some exposure to traditional asset classes and a large exposure to absolute return strategies and alternative assets to cushion against market drawdowns.</p> <p>The broad asset allocation mandate and underlying asset strategies aim to reduce volatility and maximise risk-adjusted returns over the recommended time-frame.</p> <p>Asset allocation decisions are based on long-term cycle and valuation forecasts, with high conviction tactical tilts made to markets and strategies when the reward to risk opportunity is compelling.</p>

Indicative number of holdings	12 to 30
Suggested minimum investment timeframe	5+ years
Investment return objective	To provide a higher level of income (before fees) than the S&P/ASX200 Accumulation Index over rolling five year periods.
Who should invest	The VCM Australian Equities Income Model Portfolio is designed for investors seeking Australian equities exposure who are focused on income over the long-term.
Description	<p>The VCM Australian Income Growth Model Portfolio is an actively managed Australian equities portfolio that predominantly targets stocks with defensive and high yield characteristics to achieve an income focused return portfolio.</p> <p>This SMA Model Portfolio aims to generate a higher dividend yield than the S&P/ASX 200 Accumulation Index by investing in stocks which fit the above description.</p>
Indicative asset allocation	Australian equities: 85% to 99% Cash: 1% to 15%
Benchmark	S&P/ASX 200 Accumulation Index
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

Investment Manager	InvestSense Pty Ltd														
Style	Style Agnostic														
Indicative number of holdings	7 to 60														
Suggested minimum investment timeframe	5 years														
Investment return objective	To achieve a return of CPI +2% pa over the long term.														
Who should invest	<p>Designed for investors who:</p> <ul style="list-style-type: none"> • seek a modest return above inflation but with a medium tolerance for risk and are therefore willing to accept a degree of volatility in their portfolio in order to achieve their long-term objective; • seek a portfolio diversified across a range of different asset class; and • want a portfolio where the asset allocation is actively managed based on changes in market valuations. 														
Description	<p>InvestSense believes that prevailing market valuations tend to be indicative of final outcomes over long-time periods. By undertaking a forward-looking view of expected returns and implied risks, InvestSense aims to understand if the market is sufficiently rewarding investors for the risks they are undertaking across different asset class. The portfolio does not have a pre-defined asset allocation, instead InvestSense employs an objective based approach which aims to determine the appropriate mix of asset classes that is likely to achieve the stated objective while minimising the level of risk. As investment markets fluctuate and therefore expected returns change, InvestSense alters the asset allocation accordingly. The portfolio manager's strategy is relatively unconstrained and there may be times when the actual asset allocation will deviate significantly from the expected long term average position. This SMA Model Portfolio aims to generate a higher dividend yield than the S&P/ASX 200 Accumulation Index by investing in stocks which fit the above description.</p>

Watershed Income

Code	SMAWAT01S
Investment Manager	Watershed Funds Management Pty Ltd
Style	Neutral
Indicative number of holdings	10 to 20
Suggested minimum investment timeframe	3+ years
Investment return objective	To deliver an income return of 2% above the benchmark, net of fees, while limiting the risk of permanent capital loss over rolling 3 year periods.
Who should invest	The Watershed Income Model Portfolio is designed for investors seeking higher than market, stable, tax-efficient income returns and have a medium-term investment horizon with no expectations of capital gains from their investment
Description	<p>The Watershed Income Model Portfolio aims to provide a concentrated fixed interest exposure and invests in listed hybrid/bond securities, Exchange Traded Funds (ETFs), listed managed funds and listed investment companies. The portfolio has a bias towards listed hybrid/bond exposure and highly rated, floating or variable rate fixed interest securities.</p> <p>This SMA Model Portfolio aims to exhibit limited capital volatility over the suggested investment timeframe and is not expected to generate significant long-term capital growth. Issuers of listed hybrid/bond securities must have an investment grade credit rating. The portfolio's allocations to ETFs, listed managed funds and listed investment companies may contain underlying exposure to fixed interest securities rated below investment grade.</p>
Indicative asset allocation	Australian fixed interest: 80% to 98% Cash: 2% to 20%
Benchmark	UBS Bank Bill Index
Risk level	High
Standard Risk Measure	6
Minimum Portfolio Size	\$50,000. Refer to Section 5.4 for more information on Minimum Portfolio Size.

6. Fees and costs

This Section shows the fees and other costs you may be charged in relation to the SMA.

The following fees and costs may be deducted from your money, from the returns on your investment, or from the assets of the SMA as a whole. Taxes are set out in Section 7 of this document and the Short Form PDS. You should read all of the information about fees and costs because it is important to understand their impact on your investment. Fees and costs for particular SMA Model Portfolios are set out in Section 6.1 of this document.

Fees and costs summary across all Model Portfolios¹

Macquarie Separately Managed Account

Type of fee or cost	Amount	How and when paid
Ongoing annual fees and costs		
Management fees and costs: ² The fees and costs for managing your investment.	0.000% - 1.580% pa ¹	This comprises: a) a management fee (dependent on your SMA Model Portfolio) ranging from 0.000% - 1.398% pa deducted monthly in arrears from the cash balance of your SMA account, and b) fees and costs (dependent on your SMA Model Portfolio) ranging from 0.000% pa - 1.178% pa that indirectly reduces the value of investments in the SMA Model Portfolio. These costs are reflected in the value of your investment when incurred.
Performance fees: ² Amounts deducted from your investment in relation to the performance of the product.	0.000% - 1.033% pa ¹	These amounts are deducted by the issuers of managed funds held in the SMA Model Portfolio and are reflected in the value of your investments when incurred.
Transaction costs: ² The costs incurred by the scheme when buying or selling assets.	Indirect Transaction Cost: 0.000% - 0.315% pa ¹	An estimate of the amount by which the return on the managed investments in the SMA Model Portfolio has reduced over a year, for transaction costs deducted by the issuers of the managed investments in the SMA Model Portfolio. These costs are reflected in the value of your investments when incurred, and
	PLUS Listed Transaction Fee: \$0.00 - \$1,265.00 pa ¹	An estimate of annual Listed transaction fees for trades of listed securities in the SMA Model Portfolio (at a rate of \$5.50 per listed security trade). Listed transaction fees will be either deducted from the sale proceeds or added to the purchase costs of a transaction, processed on the cash balance of your SMA Account at the time the trade settles.

¹ Section 6.1 sets out these fees and costs for each SMA Model Portfolio.

² These figures include estimates.

6. Fees and costs

Macquarie Separately Managed Account

Type of fee or cost	Amount	How and when paid
Member activity related fees and costs (fees for services or when your money moves in or out of the scheme)³		
Establishment fee: The fee to open your investment.	Nil	Not applicable
Contribution fee: The fee on each amount contributed to your investment.	Nil	Not applicable
Buy-sell spread: An amount deducted from your investment representing costs incurred in transactions by the scheme.	Nil	Not applicable
Withdrawal fee: The fee on each amount you take out of your investment.	Nil	Not applicable
Exit fee: The fee to close your investment.	Nil	Not applicable
Switching fee: The fee for changing investment options.	Nil	Not applicable (but a Listed transaction fee will apply to each transaction involved in switching SMA Model Portfolios). ⁴

³ See Section 6.2 for details on other fees and costs.

⁴ See the *Listed transaction fee* section in Section 6.2 of the Information Booklet for further details on the application of the Listed transaction fee.

6.1 Detailed fees and costs and cost of product for 1 year

Cost of product for 1 year

The cost of product gives a summary calculation about how ongoing annual fees and costs can affect your investment over a 1-year period for all SMA Model Portfolios. It is calculated in the manner shown in the Example of annual fees and costs in Section 6 of the PDS. The cost of product assumes a balance of \$50,000 at the beginning of the year with a contribution of \$5,000 during the year. Refer to the Fees and costs summary in Section 6 for any additional fees that may apply. You should use this figure to help compare this product with other products offered by managed investment schemes. Note that some SMA Model Portfolios may have a higher or lower minimum investment amount than the \$50,000 used to calculate the Cost of product set out in the table below. The table on the right sets out the fees and estimated costs for each SMA Model Portfolio referred to in the Fees and costs summary across all Model Portfolios. Please see Section 5.17 for details about the minimum investment for each SMA Model Portfolio.

Australian Equity Model Portfolios

* These figures are estimates for a previous financial year.

1 The Cost of Product equals the sum of the Total management fees and costs, Performance fees and Transaction costs (including indirect transaction costs and Listed Transaction fees). Cost of Product is calculated by multiplying the percentage-based fees by the \$50,000 account balance and summed with the dollar based Listed transaction fee.

2 The Performance fee is generally calculated based on the average of the performance fee per annum over the previous 5 financial years. See the Performance fees section in Section 6.2 for further information on the calculation of performance fees.

3 Where indirect transaction costs are less than zero for a SMA Model Portfolio, we have disclosed these costs as 0.00% in the table and use 0.00% for the purposes of the calculation of the Cost of Product for that SMA Model Portfolio. See Indirect transaction costs section in Section 6.2 for further information on the calculation of the indirect transaction costs.

4 See *Listed transaction fees* section in Section 6.2 for further information on the application of the Listed transaction fee.

6. Fees and costs

6.2 Additional explanation of fees and costs

Management fee and costs

Management fees and costs are primarily made up of management fees and certain indirect costs described below. These fees are set out in Section 6.1 for each SMA Model Portfolio.

Management fee

The management fee is paid to MISL. From this management fee, the main costs of operating the SMA are paid, such as:

- investment management fees
- custody
- administration.

The management fee is applied to the total value of your Portfolio. It is calculated daily using market close prices and managed fund withdrawal prices (as applicable), and deducted monthly in arrears from your cash balance. Calculation of management fees will commence from the date your initial contribution is received.

Indirect Management fee and costs

Indirect costs included in management fees and costs may indirectly reduce your investment and are not charged to you directly as a fee. Typically indirect costs are charged by managed funds, ETFs, Listed Investment Companies (LIC), wholesale funds and other investment vehicles.

The indirect costs included in management fees and costs are generally based on the weighted average of each security held in an SMA Model Portfolio for a prior financial year. You should refer to the relevant security's offer document for full details of their fees and costs.

Transaction costs

Transaction costs are made up of listed transaction fees charged by MISL (where applicable) and indirect transaction costs charged by the issuers of the securities that you hold (where applicable). The transaction costs are set out in Section 6.1 for each SMA Model Portfolio. Transaction costs are an additional cost to investors.

Listed transaction fee

MISL charges a Listed transaction fee of \$5.50 per trade of listed securities (which include but is not limited to ASX listed ETFs, LICs and A-REIT securities) within your SMA Account. This fee includes GST, however no RITC is claimed. MISL may subsequently determine a RITC is available for this fee. If a RITC is claimed, we will endeavour to pass this on to you.

The Listed transaction fee also covers brokerage and costs incurred by MISL associated with the processing and settlement of the trade.

The Listed transaction fee will be either deducted from the sale proceeds or added to the purchase costs of a transaction processed on the cash balance of your SMA Account at the time the trade settles. MISL may charge a lower Transaction Fee for low value trades as determined by MISL from time to time.

MISL does not charge any transaction or settlement fees for trades involving unlisted managed funds or on corporate actions.

The number of trades that may occur within your SMA Account will vary between SMA Model Portfolios and will depend on a range of factors, including but not limited to, the Investment Manager and changes they make to the SMA Model Portfolio holdings and weightings, market liquidity of the securities held within the SMA Model Portfolio, as well as any trading required to align your Portfolio to the SMA Model Portfolio. Please refer to 5.5 Rebalancing of Portfolios for scenarios where trading may occur within your SMA Account.

The estimated listed transaction fee in Section 6.1 is based on the average number of listed securities traded for the SMA Model Portfolio in the previous financial year. Please note that the actual and/or current number of trades may be different.

It is important to note that where an order for a particular security is not completed on the one day as explained in Section 5.7 under the heading Trading, you will be charged a Listed transaction fee for each trade required to complete the relevant transaction. Using the example in that Section, where as a result of an SMA Model Portfolio change, 1,000 XYZ listed securities are required to be bought on your behalf and the order is unable to be completed on the same day, and your XYZ trades were executed over 4 days as set out in the example, you would be charged a Listed transaction fee for each of the trades as set out in the table below:

Time period	Trades completed	Transaction fee
Day 1	Purchase 300 XYZ securities	\$5.50
Day 2	Purchase 200 XYZ securities	\$5.50
Day 3	Purchase 200 XYZ securities	\$5.50
Day 4	Purchase 300 XYZ securities	\$5.50
Total	1000 XYZ securities	\$22.00

Indirect transaction costs

For the managed investments that you hold, you may also incur indirect transaction costs which are not charged to you directly as a fee. Where applicable, indirect transaction costs are an additional cost to you and are generally reflected in the price of each relevant investment. Some examples of indirect transaction costs,

which may be deducted from the income or value of your investment include brokerage, buy-sell spreads, clearing and settlement costs, custody costs and stamp duty. Refer to the relevant offer document for each managed investment held in a SMA Model Portfolio for further details on the applicable indirect transaction costs and how and when these costs are incurred.

The indirect transaction costs of an SMA Model Portfolio are generally based on the weighted average of each security held in an SMA Model Portfolio for a prior financial year.

Where indirect transaction costs are less than zero for an SMA Model Portfolio, we have disclosed these costs as 0.00%.

Performance fees

MISL does not charge performance fees but the issuers of the managed investments you hold may charge performance fees. The performance fees disclosed in this document for each Model Portfolio indirectly reduce the return on the investments in that Model Portfolio over the period of a year.

The amounts disclosed are generally calculated based on the average of the performance fee per annum paid over the previous 5 financial years for a managed investment and the weighted average of the managed investments held in an SMA Model Portfolio for a prior financial year. The calculated performance fees for the SMA Model Portfolios are set out in the table in Section 6.1.

Fees on other incidental services

In certain circumstances, fees for incidental services are also charged at our discretion. Generally, these fees are charged on the basis of recovering the costs incurred in providing these services.

These fees include:

- **Security transfer fee:** \$65.00 per holding, for transfers from the SMA to your Platform Account
- **Time based service fee:** \$132.00 per hour for services such as cost base adjustments.

These amounts may increase if the cost of providing the services increases. We will give you notice as required by law, if any fees or charges increase.

Government charges

Government taxes such as stamp duties and GST will be applied to your account as appropriate. See Section 7 of this document and the Short Form PDS for more information concerning the application of tax to your investment. Fees include the net effect of GST (unless otherwise indicated). This means that fees stated in this Information Booklet represent the fee charged plus applicable GST, less any RITCs that have been claimed by the SMA.

Where we have claimed a RITC, we will pass the benefit of this onto you. However, from time to time, changes to the nature of these fees may mean that we are no longer able to claim RITCs in respect of certain costs. If that happens, the full GST amount will be passed to you.

Maximum fees

Under the Constitution, MISL is entitled to a management fee of up to 2.5 per cent pa (plus GST) of the value of the SMA's assets. MISL, as responsible entity, may waive the whole or any part of the remuneration to which it otherwise would have been entitled. The current management fees are included in the management costs stated in the table on pages 322 to 340.

The Constitution also allows us to charge for transfers, cash deposits and investment withdrawals, and dishonour, stop or similar payments at a rate of up to 50 per cent in excess of the actual GST inclusive cost incurred. It also allows us to charge a time in attendance fee of up to \$150 per hour (adjusted for CPI) for work performed on behalf of a client in respect of ancillary services provided in connection with the SMA.

We also have the right, subject to the Corporations Act, to be reimbursed from the SMA's assets for all expenses that we incur in the proper performance of our duties as responsible entity. We do not currently charge these expense recoveries.

The Constitution also allows the fees listed below to be charged in the SMA. None of these fees are currently charged. We will give you notice as required by law, if any of these fees will be charged. These fees are quoted exclusive of GST that will be added where applicable:

- brokerage of up to \$100 or \$US 100 per lot, whichever is greater, for futures transactions
- fee of up to one per cent of the principal value for foreign exchange transactions
- fee of up to 2.5 per cent of the yield to maturity in respect of fixed interest transactions
- entry and exit fees of up to five per cent of the amount contributed or withdrawn from the SMA.

Changes to fees

We reserve the right to vary fees, and to introduce additional fees. Factors which may lead fees to vary include legal, economic, policy and procedural changes. The right to vary fees is at MISL's discretion, subject to any restrictions under the Constitution and the law and this is not an exhaustive list of circumstances that would lead us to vary the fees of the SMA. We will give you notice as required by law, if any fees or charges increase.

Differential fees

Fees may be negotiated on an individual basis with wholesale clients (within the meaning of the Corporations Act), such as institutional investors and the operators of

6. Fees and costs

master trusts and wrap accounts, generally because of the large amounts they invest. Individual fee arrangements cannot be negotiated with investors who are not wholesale clients. Please contact your financial adviser for further information.

Other disclosures

To the extent permitted by law, we may receive a broker handling fee for new issues, placements etc. These are paid, where permitted by law, to us by the distributor.

The fees and costs do not include fees and costs payable for investing via an Eligible Platform. Please consult the offer document for your Eligible Platform provider for information about these additional fees and costs.

MISL may receive rebates from fund managers on management fees paid on managed fund investments.

We will endeavour to pass these rebates on to you.

7. How managed investment schemes are taxed

The following is a general summary of taxation implications for resident Australian individuals who hold their investments on capital account and who are not subject to the Taxation of Financial Arrangements (**TOFA**) provisions in the Tax Acts. Tax comments are made on the basis that you will have an absolute entitlement to the assets in your portfolio.

This means all income and capital gains and losses from assets held in your portfolio will accrue as if you held those assets directly.

MISL does not provide taxation advice. Given the complex and changeable nature of the Australian taxation system, and the fact that different investors have different taxation circumstances, investors should seek the advice of an independent tax adviser.

Nature of investment

Buying and selling investments and receiving income are likely to have taxation consequences. Because assets held in an SMA Account are beneficially owned, all income, dividends, capital gains and capital losses, and their taxation consequences, pass to the investor. The SMA itself is not taxed. After the end of a tax year you will be sent details by your Eligible Platform provider of any assessable income, capital gains, tax credits and any other relevant items to include in your tax return.

Capital Gains Tax

Capital gains tax (**CGT**) consequences arise when investments within your SMA Account are sold. Where the investment was held for longer than 12 months, you may be able to apply a CGT discount to the net capital gain. If managed funds are held in your SMA Account you may also receive a distribution that includes capital gains.

Where capital losses are realised, these may be used to offset capital gains realised on assets beneficially owned by you within and outside of your SMA Account. Capital losses not utilised in a financial year may be carried forward and utilised to offset your capital gains in future years.

Typically, your Eligible Platform provider will assume that all assets in an SMA Account are held on capital account, which is reflected in the tax report issued by your Eligible Platform provider.

You should be aware that the ATO may take a different approach to the treatment of disposals of assets within

your SMA Account. The ATO may seek to treat these assets as held on revenue account.

In making an assessment, the ATO will have regard to the following:

- **nature of the activities**, particularly whether they have the purpose of profit making
- **repetition**, volume and regularity of the activities, and the similarity to other businesses in your industry
- **organisation in a business-like way**, including keeping accounts and records of trading stock, business premises, licences or qualifications, a registered business name and an Australian business number, and
- **amount** of capital invested.

Further information can be found on the ATO website.

Tax on income

Your SMA Account may derive income such as dividends, distributions from managed funds, and interest. Generally, investment income is included in your assessable income.

Tax credits (such as franking credits on equities) may be available to offset some of your tax liability if certain conditions are satisfied. Generally speaking, you must hold the relevant equities 'at risk' for at least 45 days (90 days for preference shares) to be entitled to franking credits. If there is a franking credit entitlement, the franking credits are also included in assessable income.

Tax on foreign investments

Income sourced from overseas may be subject to foreign taxes. You may be entitled to a foreign income tax offset in respect of foreign taxes paid.

Non-resident taxation

Deductions of Australian withholding tax may be made from any unfranked component of a dividend, interest, relevant Australian capital gains and other Australian sourced income for investors that are non-residents of Australia for taxation purposes subject to the availability of any domestic exemption or tax treaty relief.

7. How managed investment schemes are taxed

Please note that investment managers do not take into account your individual tax situation when making changes to the SMA Model Portfolios. Buying and selling investments may result in you incurring a tax liability.

Foreign Account Tax Compliance Act (FATCA)

FATCA is United States (**US**) tax legislation that assists the US Internal Revenue Service (**IRS**) to identify and collect tax from US residents for tax purposes that invest in certain financial accounts through non-US entities. If you are a US resident for tax purposes, you should note that MISL is a 'Foreign Financial Institution' under FATCA. MISL intends to comply with its FATCA obligations, as determined by either the FATCA regulations or the inter-governmental agreement (**IGA**) entered into by Australia and the US for the purposes of implementing FATCA and any Australian laws and regulations relating to the IGA. Australia has entered into an IGA with the US. Under these obligations, MISL will have to obtain and disclose information about certain investors to the Australian Taxation Office (**ATO**) or IRS. In order for MISL to comply with its obligations, we will also request that you provide certain information about yourself, including your US Taxpayer Identification Number (if applicable).

Common Reporting Standard (CRS)

The Common Reporting Standard (**CRS**) is the single global standard for the collection, reporting and exchange of financial account information on foreign tax residents. Australia has signed the OECD Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information. This agreement enables CRS information to be exchanged between jurisdictions' tax authorities where relevant legislation has been adopted. The Australian CRS legislation took effect from 1 July 2017. From this date, MISL is required to collect certain information about foreign tax residents to provide it to the ATO on an annual basis. The ATO may pass this information onto tax authorities in other jurisdictions who have adopted the CRS. The requirements are similar to those which exist under FATCA, however, there are a greater number of countries in respect of which the ATO may provide information to the respective tax authorities.

Tax File Number (TFN) and Australian Business Number (ABN)

The collection of your TFN is authorised, and its use and disclosure strictly regulated by tax laws and the Privacy Act. You do not have to provide your TFN, and declining to do so is not an offence. If you do not quote your TFN (including both TFNs for joint accounts), ABN or provide an exemption reason, tax may be withheld from any applicable income paid to you at the highest marginal tax rate (plus Medicare Levy). You may quote your entity's ABN as an alternative to its TFN if you are making this investment for purposes related to that entity's business. For more information about the use of TFNs, please contact the ATO.

Goods and Services Tax (GST)

The SMA is registered for GST. This means, for both resident and non-resident investors, GST will be payable on most expenses incurred by MISL in respect of the SMA (such as management fees), but the SMA may be entitled to claim a RITC for some of these expenses. Where we have claimed a RITC, we will pass the benefit of this on to you. However, from time to time, changes to the nature of those fees may mean that we are no longer able to claim RITCs in respect of certain costs. If that happens, the full GST amount will be passed to you.

Deductibility of fees

The management fees and ongoing adviser service fees you pay in respect of the SMA may be deductible in the financial year in which they are incurred. For specific information on what is, and is not, tax deductible, please contact an independent tax adviser.

Taxation on investments through superannuation

If you invest in an SMA Model Portfolio via a superannuation product that is offered on an Eligible Platform, the trustee of that superannuation fund may deduct directly from your cash holding within the SMA, any tax that is payable in respect of any earnings or capital gains from that SMA Model Portfolio. Please refer to the relevant Eligible Platform offer documents for more information.

8. How to apply

There is no additional information relating to Section 8 of the Short Form PDS.

Contact your Eligible Platform provider for more information on how to establish an SMA Account.

macquarie.com
